To: paulrobertbowmanjr@proton.me **Subject:** Re: Consolidating Redundant Programs Under APEA/ITAGS + Folding In Your Classes & Colleges

Paul,

Agreed across the board — we're carrying too much redundant academic weight across lanes, and the cleanest fix is to collapse it all into APEA/ITAGS and let that be the single academic home of record. Here's how I want to do it.

1. APEA/ITAGS becomes the unified academic spine. One academic brand, one catalog, one credentialing pathway. APEA = 7 schools. ITAGS = 4 institutes. Current catalog: 2,000 courses across 24 schools — $186.2M Y5.

2. Program-by-program fold-in: RSMN Peacekeeping Academy → APEA Constitutional Enforcement. PAG 23-volume doctrine → ITAGS PAG Doctrine Institute. AVR 12-volume series → ITAGS AVR Academy (60/40 royalty honored). AMERI/GLOBAL field manuals → APEA Field Ops + ITAGS Maritime. Desert Valor → APEA Graduate Institute (Eric carve-out preserved). AIMDI K9/MPWD → APEA Continuing Ed + ITAGS Sim. RMC-Rail → APEA Field Ops + ITAGS Maritime. PSL → APEA Investigations & Intelligence. OLV → APEA Emergency Services + Investigations. MEDCOM — see section 3.

3. Folding in your classes and your colleges. MEDCOM becomes the clinical/medical school inside APEA. You as CMO / Senior Medical Director — enterprise-wide, no dilution. APEA-MED-### course numbering. Your colleges retain their branding via APEA/ITAGS articulation agreements. **TEAC.pro carve-out stays intact** — not assigned to Master Holding Trust, remains your property. Optional 90-day trustee window still open.

4. What I need from you this week: active colleges/teaching affiliations to fold in, current and proposed courses, faculty for the APEA instructor corps under MEDCOM, preferred revenue split structure.

5. Timing: Consolidation package drafted for counsel review within 30 days.

6. Continuity: No vacancies. No dilution. No change to Schedule D IP routing. TEAC.pro carve-out preserved. Desert Valor Joint Works carve-out preserved. Your role gets stronger under this structure, not weaker.

Bobby

A2. Robert Beard — `19db07d4c6998c70`

To: robert@beardconsulting.us **Subject:** Re: Gall / Contact Attempt to AVR on Patents — Posture & Next Steps

Robert,

Thanks for flagging this. Noting for the record so we stay clean under INC-2026-01.

1. Status: Removed for cause per INC-2026-01. No role, no authority, no representation, no IP claim. Permanent.

2. The approach to Anna on patents. Any outreach to Anna Von Reitz by a third party purporting to speak to ASG patents, ASG IP, or the AVR publishing relationship is unauthorized and is not sanctioned by the Principal Owner. The IP spine is locked: All IP owned by ASG Master Holding Trust per Schedule D v6.0. AVR-derivative works run on R-SCHD-16-B 60/40 split (60% Anna / 40% ASG Buffalo Publishing) via private contract — not through any intermediary. No outside party has standing to renegotiate. Period.

3. Next steps: Preserve evidence. Do not engage back. I'll route preservation through counsel under INC-2026-01 (Option A — civil remedies first; Option B prepped for counsel only). If Anna gets contacted directly, my message to

her will be: any such outreach is unauthorized, treat it as noise. Royalty arrangement unchanged.

4. Continuity: No vacancies. No dilution. No change to Schedule D. DV/TEAC.pro carve-outs honored.

5. Your role: Appreciate the heads-up — exactly the catch the Senior Deputy Executive Director chair exists for. Eyes on it. Forward any future attempt straight to me for counsel.

Standing by.

Bobby

LISA TORRES

Candidate Dossier · ASG MEDCOM · 2026-04-23

Robert "Bobby" Cirello, Principal Owner

American Services Group (ASG) / Global Services Group (GSG)

principal.asg@pm.me · www.asgdirectorate.com

Internal · Counsel-Gated · OSCGJ

1. Candidate Snapshot

AT A GLANCE

Name: Lisa Torres

Location: Marmora, Ontario, Canada

Email: dbalisatorres@protonmail.com · Phone: +1-613-413-9000

Application Date: 2026-04-16 · Addressed To: Paul Bowman, CMO

Secondary Openness: Education lane (complementary leadership domain)

Governance Literacy: UIA and PMA authorship — directly relevant to ASG OSCGJ posture

2. Title Structure

DUAL-TITLE APPOINTMENT

Hired title (day one): Director of Health, Medical, Education, and Research (DHMER).

Aspirational title: Executive Medical Director (EMD) — earned on 12-month defined-milestone advancement track.

Rationale: DHMER reflects the four domains Torres actually bridges (Heilkunst clinical practice · integrative medical governance · decade of education leadership · ethics-aligned research). EMD is honored in spirit from her April 16 application letter and is the promotion target inside MEDCOM. The dual structure lets Paul Bowman retain the Senior Medical Director / CMO seat while Torres grows into full Executive authority on a measurable pathway.

3. Credentials Summary

Credential	Institution	Relevance
Doctor of Medical Heilkunst (DMH)	International Heilkunst Association	Integrative clinical authority
Master of Education (Admin & Prof Dev)	Université de Montréal	Education leadership + workforce development
Practitioner Diploma Heilkunst & Homeopathy	Hahnemann College	Clinical foundation
10+ yrs Clinical Leadership	ACCESS Homeopathy Clinic (Founder/Director)	Founded regulator-approved integrative model; won competitive government grant
Governance Architect	Soulshine Community (UA, ~300 members)	Co-authored constitution, policies, membership agreements — directly parallels ASG UIA work
Acting Principal/VP/HOF	Al Ghadeer Public School (UAE, ADEC)	Institutional launch + regulatory compliance + cross-cultural leadership
Founder & Lead	Connect PMA (2020–2025)	Stood up Private Membership Association for COVID-era community support
Public Teaching	Trent University, York, Trillium	Credibility in higher-ed + K–post-grad pipeline

4. Strategic Fit

STRENGTHS

Governance literacy — she has built and stewarded both a UIA and a PMA. She speaks ASG's jurisdictional dialect natively.

Founded and grew a regulator-approved integrative clinic — precisely the category needed for APEA Emergency Services & Tactical Medicine holistic track.

Multidisciplinary practitioner network (75+ modalities) — plug-and-play feed into the MEDCOM referral architecture.

Institutional launch experience (325-student kindergarten, 0 → operating). ASG is in institutional launch posture across MEDCOM.

Grant-winning track record in a skeptical regulator environment — mirrors the LES / IACP / federal-grant discipline ASG runs.

Integrative, holistic wellness framework — aligns with ASG's whole-person service posture for peacekeepers, responders, veterans, retirees.

Research posture — her own cover letter explicitly names "aligned ethical research" as a core interest, justifying the Research domain of DHMER.

CONSIDERATIONS

Heilkunst/Homeopathy is her clinical core — positions as integrative/holistic, not allopathic tactical medicine. Natural pairing with Paul's allopathic/EMS backbone; not a replacement for it. Lane discipline matters.

Canada-based — DHMER role may require periodic presence in CONAM campuses (Desert Valor, Mountain Springs NV, future PHL250). Remote-primary with travel cadence is workable.

No prior federal / military / tactical medicine operator exposure — pair with a tactical-medic co-lead inside MEDCOM for operator-facing training modules.

Governance authorship credentials strong but sample size is a 300-member UA — not yet tested at ASG's $46.5B portfolio scale. Expected growth curve.

"Limited and intentional clinical/teaching engagement" — she wants to keep a patient-facing foot in. Compatible with DHMER scope cap (≤ 20% time, ASG-sanctioned).

5. Role Definition — DHMER (Hired Title)

DHMER — Director of Health, Medical, Education, and Research

Reports to: Paul Bowman, Senior Medical Director / CMO, MEDCOM.

Peer of: Head of AVCOM, Senior Executive Director of Communications.

Lane: MEDCOM — clinical governance (holistic/integrative wing) · education integration · research coordination.

Does NOT touch: APC, SOCOMM, APCMD ESU, OIIC, NDCC/Sentinel (hard lane boundary).

Responsibilities under DHMER:

Health — stand up the integrative/holistic wing of MEDCOM alongside Paul's allopathic/tactical backbone. Own clinical governance of all non-allopathic protocols (Heilkunst, homeopathy, nutrition, wellness). Chair the ASG Integrative Wellness Council.

Medical — coordinate with Paul on dual-wing clinical standards (allopathic + integrative). Serve as deputy clinical authority when CMO is unavailable.

Education — shepherd the college / university articulation pipeline (Trent, Université de Montréal, ADEC-era international schools, Ontario district school boards) into ASG/APEA as articulation partners. Own the APEA Emergency Services & Tactical Medicine holistic-wellness track (APEA-MED-HOL-100 series).

Research — design the ASG ethics-aligned research framework: IRB equivalents, protocol review, cross-program data ethics, publication discipline. Liaison to ITAGS Applied Research Institute.

6. Advancement Pathway to EMD (12-Month Milestone Track)

Promotion from DHMER to Executive Medical Director (EMD) is earned, not automatic. Four milestone gates:

Month	Milestone	Measure
M1–M3	Integrative Wellness Council stood up	Charter adopted · 6+ cross-program representatives seated · first council session held
M3–M6	APEA-MED-HOL-100 series launched	10+ courses live · first cohort enrolled · first syllabus reviewed by counsel
M6–M9	3+ articulation agreements signed	Minimum 3 colleges/universities bring credit flow both directions
M9–M12	Research framework operational	IRB equivalent standing · first research protocol reviewed · first ASG-branded publication shipped

Hit all four gates → promotion to EMD with enterprise-wide clinical authority. Miss any → DHMER scope remains, no demotion, re-evaluate at 18 months.

7. Cross-Program Integration

Program	DHMER Integration Point	Lane Owner
APEA/ITAGS	Holistic-wellness track; articulation agreements; ITAGS Applied Research liaison	Torres (content) · APEA Trust (cert)
RSMN	Retiree wellness protocols; peer-support clinical framework	RSMN Ops · DHMER clinical oversight

Desert Valor	Resilience / family support curriculum at Mountain Springs + Tahoe + Mead	DV lane · DHMER wellness lead
OLV	Survivor clinical care framework (child protection trauma-informed)	OIIC · DHMER clinical consult
RMC-Rail	Hospital Train medical governance standards	RMC-Rail lane · DHMER advisory
AIMDI (MPWD)	Handler welfare + working-dog care veterinary interface	AIMDI lane · DHMER liaison only
PAG/AVR Doctrine	Integrative health & safety language review in doctrine series	Buffalo Publishing · DHMER reviewer
PSL	Clinical-billing compliance intersection (investigations)	OIIC · DHMER consult

8. IP & Trust Posture

LOCKED

All IP generated in-role routes to ASG Unified Command Master Holding Trust per Schedule D v6.0.

TEAC.pro carve-out (Paul Bowman) preserved — no cross-contamination.

Desert Valor Joint Works carve-out (Eric Janik) preserved.

Background IP Torres brings (clinic protocols, governance documents, educational materials, Soulshine UA charter documents, Connect PMA framework) is licensed-in under private contract, not assigned. She retains full ownership of her background IP.

AVR-derivative works Torres authors or co-authors fall under 60% Anna Von Reitz / 40% ASG Buffalo Publishing royalty split (R-SCHD-16-B).

9. Continuity

LOCKED

No vacancies created. DHMER is a new role, not backfill.

No dilution of Paul Bowman's CMO authority — DHMER reports to CMO.

No change to trust ownership or Schedule D IP routing.

INC-2026-01 discipline holds. No reintroduction of removed personnel.

OSCGJ private UIA / trust framing throughout.

10. Next-Action Matrix

#	Action	Owner	Status
1	Paul Bowman reviews candidate + DHMER/EMD structure	Paul Bowman	Pending Paul
2	External counsel reviews offer terms + IP language	External Counsel	Pending Counsel
3	Intake-package request to Torres	Principal → Torres	Pending
4	Principal authorization to release offer	Principal	Pending
5	Send signed offer	Principal	Pending
6	Start date + 90-day mutual review	Principal + Torres	Pending
7	12-month milestone review → promotion to EMD	Principal + CMO	Pending

Robert G. Cirello

Conditional Offer — Director of Health, Medical, Education, and Research

Date: 2026-04-23 | Status: DRAFT · Counsel-Gated

To: Lisa Torres · dbalisatorres@protonmail.com · Marmora, Ontario, Canada

From: Robert "Bobby" Cirello, Principal Owner, American Services Group (ASG) / Global Services Group (GSG)

Cc: Paul Bowman, Senior Medical Director & CMO, MEDCOM

Lisa,

Thank you for your April 16, 2026 letter of interest in the Executive Medical Director (EMD) role at ASG Medical. After review with Paul Bowman and consideration of your full portfolio across health, education, governance, and research, I am extending this conditional offer for you to join ASG in a role that fits your breadth precisely — Director of Health, Medical, Education, and Research (DHMER) — with Executive Medical Director (EMD) as the defined 12-month advancement target. This offer is conditional on (i) external counsel review, (ii) Paul's final sign-off on scope and cadence, (iii) your return of the intake package in Section 5, and (iv) execution of the private-contract DHMER engagement letter.

1. Title & Appointment Structure

DUAL TITLE

Hired title (day one): Director of Health, Medical, Education, and Research (DHMER).

Aspirational title: Executive Medical Director (EMD) — earned on a 12-month defined-milestone track inside MEDCOM.

DHMER is not a consolation — it is the most accurate description of the four domains your portfolio bridges. EMD carries enterprise-wide clinical authority and will be extended at the 12-month promotion gate on milestone clearance. The dual structure honors your April 16 application (EMD in spirit), lets Paul Bowman retain CMO continuity, and gives you measurable growth targets rather than an empty executive badge.

2. Reporting & Peers

Reports to: Paul Bowman, Senior Medical Director / CMO, MEDCOM.

Peers: Head of AVCOM, Senior Executive Director of Communications, Senior Executive Director (enterprise-wide advisory).

Chair: ASG Integrative Wellness Council (cross-program body covering RSMN wellness, Desert Valor resilience, OLV survivor care, RMC force-protection wellness).

3. Lane & Scope

LANE BOUNDARIES (HARD)

You operate inside MEDCOM. You do not operate inside — and cannot act on behalf of — APC, SOCOMM, APCMD ESU, OIIC, NDCC/Sentinel, FOSEPS, APEA certification issuance, or ITAGS institute governance. Cross-program advisory input is welcomed through the ASG Integrative Wellness Council; it is not lane crossing.

4. DHMER Responsibilities

Health — Stand up the integrative/holistic wing of MEDCOM alongside Paul Bowman's allopathic/tactical backbone. Own clinical governance of Heilkunst, homeopathy, nutrition, and wellness protocols. Chair the ASG Integrative Wellness Council.

Medical — Co-lead with Paul on dual-wing clinical standards. Serve as deputy clinical authority when CMO is unavailable. Maintain scope-capped clinical practice (≤ 20% time, ASG-sanctioned).

Education — Own the APEA Emergency Services & Tactical Medicine holistic-wellness track (APEA-MED-HOL-100 series). Shepherd the college /

university articulation pipeline (Trent, Université de Montréal, ADEC-era, Ontario district school boards) into ASG/APEA as articulation partners.

Research — Design the ASG ethics-aligned research framework: IRB equivalent standing, protocol review, cross-program data ethics, publication discipline. Liaison to ITAGS Applied Research Institute.

5. Intake Package Requested (due within 14 days of acceptance-in-principle)

a. List of active clinical / teaching affiliations with current contacts and relationship status.

b. Current and proposed course portfolio (titles + brief descriptions — we will build the APEA-MED-HOL syllabi together).

c. Any faculty you want recognized as APEA instructor corps under MEDCOM.

d. Preferred compensation structure (salary · retainer + royalty on materials · tuition-share on articulated college pipeline).

e. Current UIA / PMA governance documents you authored (for licensing review only — not for assignment).

f. Research portfolio (prior publications, ongoing protocols, research affiliations you want folded into ASG ethics framework).

6. Compensation (To Be Finalized Post-Intake)

PLACEHOLDERS

Structure options: (a) salary-based under MEDCOM; (b) retainer + royalty on materials you author; (c) tuition-share on articulated college pipeline; (d) hybrid. Final band and equity/royalty share withheld pending Paul's sign-off and counsel review. Bobby and Paul will match your preferred structure.

7. Intellectual Property & Trust Posture

IP SPINE (LOCKED)

All IP generated in-role routes to ASG Unified Command Master Holding Trust per Schedule D v6.0. Background IP you bring (clinic protocols, governance documents, educational materials, Soulshine UA charter, Connect PMA framework, research protocols) is licensed-in under private contract, not assigned. You retain full ownership of background IP. AVR-derivative works you author or co-author fall under 60% Anna Von Reitz / 40% ASG Buffalo Publishing royalty split (R-SCHD-16-B). TEAC.pro carve-out (Paul Bowman) preserved. Desert Valor Joint Works carve-out (Eric Janik) preserved.

8. Term & Review

90-day mutual review window from start date. Either party may adjust scope, compensation, or terminate without penalty within that window. After 90 days, the engagement becomes a rolling annual term with 60-day mutual termination notice. At month 12, the Advancement Review evaluates milestone clearance and determines promotion to Executive Medical Director (EMD).

9. Advancement to EMD — 12-Month Milestone Gates

Gate	Window	Measure
Integrative Wellness Council stood up	M1–M3	Charter adopted · 6+ reps seated · first session held
APEA-MED-HOL-100 series launched	M3–M6	10+ courses live · first cohort enrolled
3+ articulation agreements signed	M6–M9	Minimum 3 colleges/universities · credit flow both directions
Research framework operational	M9–M12	IRB equivalent standing · first protocol reviewed · first publication shipped

All four gates cleared → promotion to EMD with enterprise-wide clinical authority. Miss any → DHMER scope remains, re-evaluate at 18 months. No demotion.

10. Conditions Precedent

(i) External counsel review of engagement letter and IP terms.

(ii) Paul Bowman sign-off on final scope and cadence.

(iii) Your return of the intake package in Section 5.

(iv) Principal Owner execution of private-contract engagement letter.

(v) Your acknowledgment of INC-2026-01 discipline and OSCGJ jurisdictional footing.

11. INC-2026-01 Acknowledgment

REQUIRED

ASG operates under active incident discipline INC-2026-01. Senior appointments acknowledge: (a) internal matters stay internal and evidence-based — no public statements; (b) two individuals have been removed for cause, permanent, and are not to be represented or engaged in any ASG matter; (c) the trust and IP spine is locked — no outside inquiry, no renegotiation; (d) counsel-gated escalation is the only escalation path. Your signature accepts these terms.

12. Continuity Statements (Locked)

No vacancies created by this appointment. DHMER is a new role, not a backfill.

No dilution of CMO authority. DHMER reports to CMO.

No change to trust ownership or Schedule D IP routing.

TEAC.pro and Desert Valor carve-outs preserved.

OSCGJ private UIA / trust operations throughout.

Lisa, the governance authorship you bring from Soulshine and Connect PMA, the clinic you built and grew, your education leadership through ADEC and Trent, and your research posture — taken together — map directly onto the four domains of DHMER. Paul and I look forward to your intake package. On receipt, sign-off, and counsel clearance, we execute the engagement letter and move to start date. EMD is ahead of you, not behind you.

Respectfully,

Robert G. Cirello

Principal Owner, ASG / GSG

2026-04-23

AMERICAN SERVICES GROUP (ASG)

INCIDENT REPORT AND ANNEX PACKET

INC-2026-01 - David Gall and Joey Novak

Locked for Filing | Justice Anna Review Copy | Draft Witness Testimony in the form of Affidavit Included

Control Field	Entry
Prepared For	Justice Anna / Oversight Review
Prepared By	Robert "Bobby" Cirello / P1 Overwatch Actual
Date	April 2026
Classification	Internal - Confidential - Filing Preparation
Document Control	INC-2026-01-AFF-ANNEX-v1.0
Evidentiary Standard	Documented Record / Principal-Observed Fact / Open Item Pending Corroboration

NOTICE: This packet is a factual internal filing draft for governance, oversight, counsel review, and evidence preservation. It is not a public accusation document. Allegations not yet supported by attached source exhibits are marked as Open Item Pending Corroboration. Do not distribute outside approved need-to-know channels.

Table of Contents

Right-click this area in Microsoft Word and choose Update Field to refresh the table of contents.

1. Filing Memorandum

This filing packet packages the ASG INC-2026-01 record into a usable annex and declaration format for Justice Anna, counsel review, and internal oversight. The purpose is to preserve the backstory, document the governance basis for removal for cause, and lock the evidence lanes before memory drift, selective reframing, or file loss enters the room like a raccoon in a tuxedo.

The record should be read as a controlled internal account. It does not need theatrical heat. The facts carry enough weight on their own: trusted access was granted, deliverables were not produced to expectation, command confidence degraded, access and authority were terminated, and the ASG trust and intellectual property structure remains intact.

Primary determination: David Gall and Joey Novak are recorded as removed for cause from all ASG roles, access, authority, and IP claims under INC-2026-01. This packet preserves that determination while identifying what still needs source exhibits before any external or formal legal submission.

2. Mandatory 00_SHIELD_OSCGJ Header

Operating footing: American land and soil under Original Superior Concurrent General Jurisdiction (OSCGJ). All actions are private-contract, partner-safe, and within applicable public law. All operations remain subject to lane boundaries, least-privilege access, bonded risk and claims control, full documentation, and auditability.

Trust and intellectual property routing: RCTrust (Tier 0) to ASG Unified Command Master Holding Trust (Tier 1) to applicable operating trusts. Schedule D of the Master Holding Trust holds ASG intellectual property, trademarks, copyrights, patents, trade secrets, media goodwill, and derivative work product unless expressly carved out by written instrument.

3. Source Basis and Record Posture

The packet uses three evidence categories:

- Documented Record - a document, email, log, signed page, system record, or other artifact exists or is expected to be attached.
- Principal-Observed Fact - direct observation or recollection by the Principal, pending source attachment where available.
- Open Item Pending Corroboration - material requiring metadata, file copy, witness statement, or system export before it can be treated as fixed evidence.

Relevant ASG records already support the controlling framework: ASG operates through a trust architecture where Schedule D is the IP registry; lane boundaries are absolute; and Gall and Novak are already reflected in ASG material as removed from ASG roles, access, authority, and IP claims under INC-2026-01. ASG operations manuals also state that lane boundaries, least-privilege controls, bonded risk management, and unified IP routing are non-negotiable.

4. Chronology - Condensed Filing Version

Phase	Event	Summary	Record Posture
Phase 1	Entry and trusted access	David Gall and Joey Novak were admitted into the ASG working circle during active buildout. They were treated as trusted contributors and exposed to operational, governance, and strategic material.	Principal-Observed Fact / Documented Record Pending
Phase 2	Tasking and expectations	They were expected to support build tasks, maintain confidentiality, follow command direction, and produce useful work product.	Principal-Observed Fact
Phase 3	Performance degradation	Repeated failure to produce requested deliverables, coupled with delay/review loops, created operational friction.	Principal-Observed Fact / Deliverable Annex Pending
Phase 4	Control and boundary concerns	Concerns arose around authority alignment, information control, system access, and possible misunderstanding or overreach regarding ASG work product.	Open Item Pending Corroboration
Phase 5	Escalation	Risk shifted from ordinary performance issue to command-confidence and governance-control issue.	Principal-Observed Fact
Phase 6	Removal for cause	Gall and Novak were removed from all ASG roles, access, authority, and IP claims per INC-2026-01.	Documented Record

Phase 7	Containment	Access review, asset inventory, IP affirmation, and evidence preservation were initiated or directed.	In Progress

5. Findings and Determination

- Gall and Novak were granted trusted contributor access during ASG buildout.
- Their access touched work product and systems that fall under the ASG trust and Schedule D IP control model.
- Non-production and delay patterns created measurable operational drag.
- Control and authority concerns created an elevated governance risk requiring containment.
- Removal for cause was a proportionate internal control action.
- No vacancy, dilution of authority, or IP ownership change resulted from removal.
- The core ASG valuation story and future optionality remain intact because assets, IP, doctrine, and operating lanes route through the trust structure rather than through individual contributors.

6. Annex A - Access Revocation Timeline

Purpose: Establish a clean timeline showing what access existed, when revocation was directed, who executed it, and what evidence proves closure.

ID	Access Lane	Required Detail	Status	Action Required
A-001	Email accounts	List all ASG-related accounts used or accessed by Gall/Novak	Pending	Export admin logs / revoke credentials / preserve screenshots
A-002	Cloud drives	Identify shared folders, permissions, downloads, and external shares	Pending	Export access logs / remove permissions / hash key documents
A-003	Messaging channels	Identify Signal, text, chat, Slack/Discord/other channels if any	Pending	Preserve message exports or screenshots with date stamps
A-004	Radio/dispatch platforms	Identify admin/user accounts, talk groups, dispatch privileges	Pending	Export user list / remove credentials / preserve access snapshot
A-005	GitHub/code repositories	Identify repositories, branches, tokens, issue access, server credentials	Pending	Disable tokens / rotate secrets / save audit log
A-006	Financial/grant workspaces	Identify proposal, budget, and investor packet access	Pending	Lock files / version-control final ownership copy

Timeline Statement for Filing: Access revocation is directed as an immediate containment measure. If any access remains open, it is to be treated as a control deficiency requiring same-day closure and written confirmation.

7. Annex B - System and Server Chain-of-Custody

Purpose: Preserve system integrity and show no uncontrolled copy, server, or repository is being treated as the operational source of truth.

ID	Item	Custody Fields Needed	Status
B-001	Primary ASG working files	Folder path / platform / owner / last modified / current custodian	Open
B-002	Server or VPS environments	Provider / IP or host / admin holders / SSH keys / panels	Open
B-003	Databases and dashboards	Database name / credentials / export date / custodian	Open
B-004	Code archives	Repository name / commit hash / branch / contributor permissions	Open
B-005	AI model prompts/build files	Prompt packs / Claude.md / wrappers / model handoffs	Open
B-006	External drives or local copies	Device owner / serial / file set / custody status	Open

Custody Rule: Every file set must have a named custodian, location, access list, and preservation date. No “everybody has a copy somewhere” nonsense. That is how IP walks out wearing sunglasses.

8. Annex C - Communications Log Extract

Purpose: Build a communication timeline without editorializing. The log should include only date, sender, recipient, medium, short description, and exhibit reference.

ID	Date	From	To	Medium	Description	Exhibit
C-001	Date TBD	Bobby Cirello	David Gall	Text / Email / Call	Tasking or expectation communication	Pending

C-002	Date TBD	Bobby Cirello	Joey Novak	Text / Email / Call	Tasking or expectation communication	Pending
C-003	Date TBD	David Gall / Joey Novak	ASG group or individual	Unknown	Delay, objection, non-production, or control concern	Pending
C-004	April 16, 2026	Coordinator training call / related parties	ASG concern chain	Call/Text follow-up	Patent/IP warning discussion and spouse concern	Pending
C-005	Date TBD	Bobby Cirello	Justice Anna or liaison	Email / Text	Request for oversight awareness	Pending

9. Annex D - Deliverable Gap Analysis

Purpose: Document the difference between what was requested and what was produced. This annex should be boring, numerical, and ruthless. Requested, due, delivered, gap. Done.

ID	Requested Deliverable	Assigned To	Due Date	Delivered	Gap Statement	Exhibit
D-001	ASG operational build support	David Gall	Date TBD	Not verified	Gap pending source exhibit	Pending
D-002	OIIC / investigative support or related work	Joey Novak	Date TBD	Not verified	Gap pending source exhibit	Pending
D-003	Proposal / grant support tasks	Gall/Novak	Date TBD	Not verified	Gap pending source exhibit	Pending
D-004	System or code contribution tasks	Gall/Novak	Date TBD	Not verified	Gap pending source exhibit	Pending

Filing Language: The failure pattern is presently recorded as Principal-Observed Fact. It should be upgraded to Documented Record only after task messages, due dates, drafts, or non-delivery confirmations are attached.

10. Annex E - IP Exposure and Protection Statement

Purpose: Affirm that Gall and Novak did not acquire ownership, license, or survivable control over ASG intellectual property by virtue of contribution, review, access, or participation.

Protection Statement: All ASG intellectual property, doctrine, curricula, standard operating procedures, technical frameworks, prompts, grant models, financial models, dashboards, applications, communication architecture materials, training content, and derivative works remain property of the ASG Unified Command Master Holding Trust via Schedule D unless a written carve-out exists.

Exposure Categories:

- Governance structure, trust architecture, and command operating model.
- Grant proposal drafts, financial models, and budget architecture.
- APC, SOCOM(rb), and APCMD ESU communications structure and lane-boundary doctrine.
- OIIC intelligence and investigation materials.
- APEA course, credentialing, and training architecture.
- Sentinel, National Dispatch and Communications Center, and related governance/data concepts.
- Any software, dashboard, application, prompt, model wrapper, or code derived from ASG concepts.

Reservation of Rights: ASG reserves all rights, remedies, claims, and corrective actions related to unauthorized use, retention, disclosure, reproduction, commercialization, derivative use, misattribution, or attempted registration of ASG intellectual property.

11. Annex F - Asset Inventory: Radios, Equipment, Devices

Purpose: Identify controlled hardware or equipment that must be returned, disabled, wiped, or confirmed never issued.

ID	Asset Type	Make/Model	Serial/ID	Custodian	Required Action	Status
F-001	Radio / PTT Device	Make/model TBD	Serial TBD	Assigned to TBD	Return / disable / confirm	Open
F-002	Laptop / tablet / phone	Make/model TBD	Serial TBD	Assigned to TBD	Return / wipe / confirm	Open
F-003	Access cards / keys	Type TBD	Number TBD	Assigned to TBD	Recover / deactivate	Open
F-004	External drives / USB	Type TBD	Serial TBD	Assigned to TBD	Recover / image / seal	Open
F-005	Printed binders / notes	Title TBD	Copy number TBD	Assigned to TBD	Recover / log / destroy copy if authorized	Open

Hard-Asset Rule: APC hard assets require asset logs, serial registries, configuration baselines, delivery receipts, and maintenance records. Missing or unreturned controlled hardware is a bond/claims and evidence issue, not an “oopsie.”

12. Annex G - April 16 IP / Patent Concern Exhibit

Purpose: Preserve the April 16, 2026 warning context regarding “health and safety” IP, patents, copyrights, state/county recording, dashboards, apps, Sentinel, APC/SOCOM(rb), and related code or platform work.

Summary for Filing: On or around April 16, 2026, a coordinator training call included discussion regarding time-sensitive protection or patenting of “health and safety” related information. Subsequent concerns were raised that the topic may relate to ASG-developed dashboards, Sentinel, apps, APC/SOCOM(rb), and other software or platform work. This annex preserves that concern without asserting final proof of misappropriation until call notes, recordings, text messages, or witness statements are attached.

ID	Fact Field	Current Entry	Status
G-001	Call date and platform	April 16, 2026 / platform TBD	Pending
G-002	Speaker asking patent/IP question	Name TBD	Pending
G-003	Anna response or recommendation	Basic Copyright / record with state/county as described by reporting party	Pending source exhibit
G-004	Immediate concern report	Spouse concern / Kenny reported Kimberly had similar response	Pending witness statement
G-005	ASG IP potentially implicated	Dashboard, Sentinel, apps, APC/SOCOM(rb), code, health/safety systems	Pending review

13. Annex H - Witness Statement Templates

Purpose: Obtain short, factual witness statements without argument, speculation, or storytelling.

H.1 Witness Statement - Robert "Bobby" Cirello

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.2 Witness Statement - Kenny Fisher

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.3 Witness Statement - Kimberly [Last Name TBD]

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.4 Witness Statement - Freeda Oshun / spouse witness if applicable

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.5 Witness Statement - Other witness TBD

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

14. Annex I - Notice of Removal for Cause

Use: Internal notice language. Keep it clean, non-defamatory, and operational. Do not add emotional commentary.

Field	Entry
To	David Gall and Joey Novak
From	American Services Group (ASG) - Principal Oversight
Subject	Notice of Removal for Cause and Termination of Access
Effective Date	[Insert date/time]

Notice Text: Effective immediately, you are removed for cause from all American Services Group roles, contributor status, access, authority, platforms, working groups, systems, files, documents, communications channels, equipment, and any claimed or implied decision-making capacity. This notice includes termination of any apparent access to ASG materials, ASG intellectual property, ASG working files, ASG proposals, ASG dashboards, ASG communications architecture, ASG training content, ASG financial models, and ASG operating trust materials.

You are directed to preserve and return all ASG materials, devices, credentials, drafts, copies, downloads, screenshots, notes, recordings, exports, code, and derivative materials in your possession, custody, or control. You are further directed not to copy, disclose, publish, register, file, commercialize, distribute, or

represent ASG intellectual property or work product as your own.

Nothing in this notice waives ASG rights, remedies, claims, or protections. All rights are reserved.

Issued by: _____ Date: _____

15. Annex J - Counsel Brief

Issue Presented: Whether ASG had sufficient internal governance basis to remove David Gall and Joey Novak for cause, terminate access, preserve evidence, and reaffirm trust/IP ownership.

Short Answer: Yes. Based on the current record, ASG has a documented operating model requiring lane boundaries, least-privilege access, bonded risk management, evidence preservation, and Schedule D IP routing. Gall and Novak are reflected in ASG records as removed for cause from all roles, access, authority, and IP claims. The annex pack identifies the remaining factual exhibits required to support any external action or formal claim.

Counsel Review Points:

- Confirm all access termination is complete and documented.
- Review whether any cease-and-desist language should issue after evidence preservation.
- Review whether any returned property demand should be sent separately.
- Review whether state/county copyright recording or supplemental IP notice should be filed.
- Review whether witness declarations should be notarized or kept as unsworn internal statements pending escalation.
- Review whether any third-party platform has ASG code, files, or grant materials uploaded by unauthorized persons.

16. Affidavit / Declaration of Robert “Bobby” Cirello

STATE OF _____

COUNTY OF _____

DECLARATION OF ROBERT “BOBBY” CIRELLO

I, Robert “Bobby” Cirello, being competent to state the matters below and having personal knowledge of the facts stated unless otherwise identified as pending corroboration, declare as follows:

1. I am the Principal Owner and principal oversight authority for American Services Group (ASG).

2. ASG operates through a trust-anchored structure in which intellectual property and derivative work product route to the ASG Unified Command Master Holding Trust Schedule D unless expressly carved out by written instrument.

3. David Gall and Joey Novak were admitted into the ASG working circle and were provided trusted contributor access during the buildout of ASG operational, governance, communications, investigations, training, grant, and related workstreams.

4. Their participation created exposure to ASG work product, internal planning, proposal structure, and operational concepts.

5. During the build process, I observed repeated performance, delivery, delay, and command-confidence concerns involving Gall and Novak.

6. As these concerns continued, the matter shifted from ordinary performance disagreement into a control, access, and governance risk requiring containment.

7. I determined that removal for cause was necessary to protect ASG continuity, intellectual property, operational control, and trust integrity.

8. David Gall and Joey Novak were removed from all ASG roles, access, authority, and IP claims under INC-2026-01.

9. To the best of my knowledge, their removal created no vacancy, no dilution of ASG authority, no transfer of ownership, and no change to ASG trust ownership or Schedule D intellectual property routing.

10. I have directed that access logs, communications, deliverable gaps, assets, system custody, and IP exposure be preserved and annexed to this record.

11. Any statement in this packet marked as Open Item Pending Corroboration is not presented as a final evidentiary conclusion until the relevant exhibit, witness statement, or system record is attached.

12. I reserve all rights and remedies for ASG, the ASG Unified Command Master Holding Trust, and all applicable operating trusts concerning unauthorized access, retention, disclosure, copying, derivative use, filing, commercialization, or misrepresentation of ASG materials.

I declare under penalty of perjury under the applicable rules of the chosen forum, and/or affirm under private contract record, that the foregoing is true and correct to the best of my knowledge, information, and belief.

Executed this ____ day of _____, 2026.

17. Filing Checklist

#	Checklist Item	Status
1	Attach source version of ASG record stating removal for cause under INC-2026-01	Open
2	Attach Schedule D / trust/IP proof or summary certificate	Open
3	Attach system access revocation exports	Open
4	Attach communications screenshots / email exports with metadata	Open
5	Attach asset inventory and return demand if needed	Open
6	Attach April 16 IP/patent concern exhibit and witness statements	Open
7	Counsel review for external notice / cease-and-desist posture	Open
8	Finalize affidavit for autograph/notary/ witness	Open

18. Closing Filing Note

This packet is now structurally ready for filing prep. It is deliberately built with placeholders where exhibits are still needed, because pretending gaps are proof is how people get cute and then get smoked on cross-exam. The next hard move is exhibit attachment: logs, messages, access records, and witness statements. Once those are attached, this becomes a locked record, not a story.

19. Source Notes for Internal Reviewer

- ASG Combined Master Grant materials reflect Schedule D trust ownership, lane boundaries, and the specific removal-for-cause entry for Gall and Novak under INC-2026-01.
- ASG Operations Manual materials establish lane boundaries, least-privilege access, bonded risk controls, unified IP routing, records/ evidence requirements, and risk/bond triggers.
- Prior ASG IP Containment Plan notes identified the recommended Version 2 annex build: radio serial/property schedule, server chain-of-custody, access-revocation timeline, April 16 patent-warning exhibit, and source appendix with email metadata.

1. Purpose

This matrix tracks the status of every annex, filing checklist item, and counsel review point in the INC-2026-01 Annex Pack (filed 2026-04-23 as INC-2026-01_Annex_Pack_Affidavit_Locked_for_Filing.docx). Items marked Framework Ready have structure and language locked — they await source exhibits. Items marked Ready For Issue are counsel-gated and await external counsel instruction. Items marked Locked are complete and self-contained inside the annex pack itself.

Classification: Internal · Confidential · Filing Preparation

Sibling Files: INC-2026-01_Counsel_Packet.docx · INC-2026-01_Gall_iMessage_Intake_Log.md

3. Annex Status (A through J)

Annex	Subject	Status	Notes
A	Access Revocation Timeline	Framework Ready	6 access lanes (email, cloud, messaging, radio, code, financial) — table structure locked. Awaiting admin-log exports.
B	System & Server Chain-of-Custody	Framework Ready	6 custody categories — custodian/ location/access fields set. Awaiting named-custodian assignments.
C	Communications Log Extract	Framework Ready	5 comm rows — date/sender/ recipient/medium/description/ exhibit. 4 of 5 pending metadata extraction.
D	Deliverable Gap Analysis	Framework Ready	4 deliverable rows — requested/due/ delivered/gap. All pending source-task records.
E	IP Exposure & Protection Statement	Locked	Protection statement locked. Reservation of rights language in place. 7 exposure categories named.
F	Asset Inventory (Radios/Equipment/ Devices)	Framework Ready	5 asset rows — make/model/serial/ custodian/action. Awaiting physical asset audit. Primary hardware: KoYoTom YAMO POC handhelds on RealPTT network.
G	April 16 IP/Patent Concern Exhibit	Framework Ready	5 fact-field rows locked. Awaiting call recording, witness names, text exports.
H	Witness Statement Templates	Ready For Issue	5 blank templates (Cirello, Fisher, Kimberly TBD, Freeda Oshun, TBD) ready for circulation.
I	Notice of Removal for Cause	Ready For Issue	Notice text locked, non-defamatory, operational. Ready to issue on counsel go.
J	Counsel Brief	Locked	Issue-presented / short-answer / 6 counsel review points locked.

4. Filing Checklist (8-Item)

#	Item	Status	Action or Anchor
1	ASG record stating removal for cause under INC-2026-01	Locked	Reflected in Schedule D v6.0 sidebar + counsel packet + Annex Pack §1 filing memo.
2	Schedule D / trust / IP proof or summary certificate	Locked	Schedule D v6.0 live at 04_COMBINED_DELIVERABLES/. 4 dashboards carry crimson INC sidebar with counsel-packet + annex-pack + matrix links.
3	System access revocation exports	Framework Ready	Annex A framework built. Need: Gmail admin logs, Drive/Box permissions export, Signal/Slack exports, radio-platform user list, GitHub token audit.
4	Communications screenshots / email exports with metadata	Framework Ready	Annex C framework built. Batch 04 Proton forwards (EE-01/EE-02/ EE-03) authorized, pending ingest.
5	Asset inventory & return demand	Framework Ready	Annex F framework built. Hardware in scope: KoYoTom YAMO POC UHF/GPS-C/VHF dual-mode handhelds — serial numbers TBD.
6	April 16 IP/patent concern exhibit + witness statements	Framework Ready	Annex G + Annex H templates ready. Need call recording/notes + witness statements.
7	Counsel review for external notice / cease-and-desist posture	Counsel-Gated	Counsel Brief (Annex J) issue-presented and short-answered. Counsel go/no-go required.
8	Finalize affidavit for autograph / notary / witness	Locked	12-paragraph declaration text locked in Annex Pack §16. Ready for autograph + notary on Principal schedule.

5. Counsel Review Points (Annex J — 6-Point)

#	Review Point	Status	Notes
1	Confirm all access termination complete & documented	Framework Ready	Access revocation framework live; log exports required.
2	Cease-and-desist language — should it issue?	Counsel-Gated	Counsel decision. Option A civil remedies first remains default.
3	Returned property demand — should it issue separately?	Counsel-Gated	Annex F asset inventory populates the demand. Counsel timing call.
4	State/county copyright recording or supplemental IP notice	Counsel-Gated	Requires Schedule D IP inventory review. All IP already routed to Master Holding Trust.
5	Witness declarations — notarize or keep as unsworn internal	Counsel-Gated	Templates ready for either path.
6	Third-party platform scan for unauthorized ASG IP/files/grants	Active	Weekly contractor surveillance scan running (Monday 8AM). RED/YELLOW/GREEN classification.

6. IP Exposure Categories (Annex E, mapped to Schedule D v6.0)

Category	Schedule D Anchor
Governance structure, trust architecture, command operating model	Schedule D §II
Grant proposal drafts, financial models, budget architecture	Schedule D §V, §X
APC / SOCOMM / APCMD ESU communications structure + lane-boundary doctrine	Schedule D §II lane lock
OIIC intelligence and investigation materials	Schedule D §II operating trusts
APEA course, credentialing, and training architecture	Schedule D §V (2,000 courses)
Sentinel / NDCC / governance-data concepts	Schedule D §II Tier-3B
Software, dashboards, prompt packs, wrappers, derivative code	Schedule D §V

7. Chronology Cross-Reference (Annex Pack §4 → Affidavit §16)

Phase	Event	Affidavit ¶
Phase 1	Entry and trusted access	¶ 3
Phase 2	Tasking and expectations	¶ 4
Phase 3	Performance degradation	¶ 5
Phase 4	Control and boundary concerns	¶ 6
Phase 5	Escalation	¶ 6
Phase 6	Removal for cause	¶ 8
Phase 7	Containment	¶ 10

8. Continuity (Locked)

NON-NEGOTIABLE

No vacancies created by removals. Removals are permanent.

No dilution of authority across the active executive + command layer.

No change to trust ownership or Schedule D IP routing.

Desert Valor Joint Works carve-out preserved. TEAC.pro carve-out preserved.

Lane boundaries hard: APC ≠ SOCOMM ≠ APCMD ESU ≠ NDCC/Sentinel.

Option A (civil remedies first) default posture. Option B reserved counsel-only.

INC-2026-01 discipline: internal, factual, evidence-based. No public accusations. Counsel-gated escalation only.

Language: lawful private UIA / OSCGJ. Never sovereign-citizen framing.

21. Section Q — Removed-for-Cause Register (INC-2026-01)
22. Section R — Recommendations (R-SCHD-01 through R-SCHD-22)
23. Glossary of Abbreviations & Acronyms
24. Authority, Attestation & Autograph

1. Purpose, Authority & Supersession Notice

Schedule D is the definitive intellectual-property register of the ASG Unified Command Master Holding Trust (Tier-1). This v5.1 edition supersedes v4.2 (Session 8, April 2026) and, together with v4.2's historical annexes, forms the complete, patch-forward IP record of record for American Services Group (ASG) CONAM and Global Services Group (GSG) OCONAM operations. v5.1 adds separated Copyright / Trademark / Patent / Trade Secret sections and integrates six new Emerging IP portfolios (Prometheus Unbound, Minerva Shield, Athena Patent AI, Mnemosyne Archives AI, Argus Constellation — DIANNA/LEO/Eye-in-the-Sky — and Orion Custodian — Space Traffic Control, Debris Remediation, Orbital Sanitation & Emerging Space Commerce).

Authority: Robert 'Bobby' Cirello, Principal Owner, American Services Group (ASG) and Global Services Group (GSG). Governed under Original, Superior, Concurrent, General Jurisdiction (OSCGJ). Lawful private Unincorporated International Association (UIA) / trust architecture. No sovereign-citizen framing. Patch-forward only — prior versions preserved in _archive_schedule_d/.

v5.0 locks the four-pillar IP taxonomy (Copyright · Trademark · Patent · Trade Secret) and the Emerging IP sections (E–I). Every new deliverable must be routed to exactly one pillar plus zero or more Emerging IP sections.

2. Trust Architecture & IP Assignment Spine

The ASG IP spine is a three-tier trust stack. All intellectual property created by, for, or on behalf of ASG / GSG / INTER-USOG — including emerging technology — is assigned at moment of creation to the Tier-1 Master Holding Trust under this Schedule D.

Tier	Trust	IP Role
Tier 0	RCTrust	Ultimate root. Beneficial ownership.
Tier 1	ASG Unified Command Master Holding Trust	Holds all IP via Schedule D.
Tier 1a	ASG Operations Trust	Operating cash-flow support.
Tier 1b	ASG Admin Trust	Administrative/back-office support.
Tier 2	Lane-specific trusts (APC, SOCOM(rb), APCMD ESU, FOSEPS/ FPS, OIIC, APEA, MEDCOM, AVCOM, NDCC, C-UAS, Desert Valor, DIANNA, Argus Constellation, Prometheus, Minerva, Athena, Mnemosyne, Orion Custodian)	License IP via private contract.

Assignment logic: any publication, brand, software, data set, research output, patent filing, or trade secret becomes Tier-1 Trust property at the moment of fixation. Tier-2 lane trusts operate under private license agreements; they do not own IP and cannot transfer it.

3. Carve-Outs & Exceptions

Three carve-outs apply to Schedule D v5.0:

- Desert Valor Joint Works Registry — works co-authored with Eric Janik under the executed Joint Works Assignment + Royalty Addendum are co-owned. Background IP remains with the original owner. Only items logged in the DV Joint Works Registry qualify.
- TEAC.pro — existing TEAC.pro platform IP remains with its original trust and licenses into ASG by private contract. Derivative ASG works built on TEAC.pro are Tier-1 property.
- INC-2026-01 Removed-for-Cause — David Gall and Joey Novak have zero residual IP claim, zero authority, zero access. See Section Q.

4. Section A — Registered & Unregistered Copyrights

All original works of authorship by ASG personnel and contractors are copyright-protected automatically upon fixation. Key works are being rolled through formal U.S. Copyright Office registration for enhanced enforcement. This section catalogues the major categories.

Category	Representative Works	Registration Target

PAG 23-Volume Series	Vols 1–23 (Ebook / Ultimate / Study / Audiobook / Video / Field Manual / Research Dossier variants)	Volume-by-volume U.S. Copyright Office TX filing
AVR 12-Volume Doctrinal	Vols 1–12 + Study Guides + ePubs	Series registration
AMERI 12-Volume Series	Vols 1–12 + product variants	Series registration
GLOBAL 12-Volume Series	Vols 1–12 + product variants	Series registration
Cirello Codex	V1 → V6 Ultimate (current)	Individual TX filing, each version
Lawful Authority Compendium	Ultimate edition (81KB)	TX filing
ASG E-Library Suite	60 products — Ebooks, Study Guides, Syllabi, Audiobooks, Video Scripts	Batch TX filing
HeyGen / Double Twin / YouTube / News Desk / Mock Court scripts	100+ media production scripts	Batch TX filing as screenplay collection
Dashboards, Skills, Build Scripts	21 custom skills, asg_helpers.py, all build_*.py, all gen_*.py	Collective TX as compilation
The Crossing (Jefferson Paine)	Three-book field manual, Vol 23 source	TX filing
Grant Proposals & Dossiers	OLV, PSL, RSMN, AIMDI, Desert Valor, RMC-Rail, PAG, APEA/ITAGS, AI Tactical Edge, AMERI/GLOBAL, Prometheus, Minerva, Athena, Mnemosyne, Argus, USCPB-KYC	Individual TX filings per program

Target: 100% TX registration of top-tier ASG works within 18 months. Interim protection is automatic; registration unlocks statutory damages and attorney's fees under 17 U.S.C. § 412.

5. Section B — Trademarks, Service Marks & Trade Dress

The ASG brand family comprises 30+ marks across six brand families. Priority marks are being rolled through USPTO registration (Principal Register, Intent-to-Use or Use-in-Commerce as applicable). Golden Dawn trade dress (navy #0D1B2A + gold #C5A028 + buffalo-scales-of-justice seal) is asserted as protectable trade dress.

Mark	Class (ICS)	Status / Target
AMERICAN SERVICES GROUP (ASG)	35, 41, 45	Priority USPTO filing
GLOBAL SERVICES GROUP (GSG)	35, 41, 45	Priority USPTO filing
ASG UNIFIED COMMAND	35, 45	USPTO filing
AMERICAN PEACEKEEPING COMMUNICATIONS (APC)	38, 41	USPTO filing
APCMD ESU	38, 45	USPTO filing
SOCOM(rb)	42 (software)	USPTO filing — disambiguation notice filed against U.S. SOCOM
FOSEPS / FPS	45	USPTO filing
OIIC	45	USPTO filing
APEA / APEA GRADUATE INSTITUTE	41	USPTO filing
ITAGS	41	USPTO filing
MEDCOM / AVCOM / NDCC / SENTINEL-JA / C-UAS	35, 38, 41, 45	Batch USPTO filing
AIMDI (including IUDJC, MPWD, DHTS)	41, 45	USPTO filing — post-rebrand (AIMDI) remediation
ASG BUFFALO PUBLISHING	16, 41	USPTO filing
PAG · PAG DOCTRINE · EVERY VOLUME TITLE	16, 41	Serial USPTO filings

THE CROSSING · CIRELLO CODEX · LAWFUL AUTHORITY COMPENDIUM	16, 41	USPTO filing
KoYoTom YAMO POC (APC comms hardware)	9, 38	USPTO filing — hardware trade dress
OPERATION LOST VOICES (OLV)	45	USPTO filing
PROJECT SILENT LEDGER (PSL)	36, 45	USPTO filing
RSMN (Retired Service Member Network)	41, 45	USPTO filing
RMC / RMC-RAIL / DESERT VALOR	41, 45	USPTO filings
PROJECT PROMETHEUS UNBOUND	42, 44	NEW — v5.0 reservation
PROJECT MINERVA SHIELD	42, 45	NEW — v5.0 reservation
PROJECT ATHENA PATENT AI	42	NEW — v5.0 reservation
PROJECT MNEMOSYNE ARCHIVES AI	41, 42	NEW — v5.0 reservation
PROJECT ARGUS CONSTELLATION · DIANNA · LEO OVERWATCH · EYE-IN-THE-SKY	9, 38, 42	NEW — v5.0 reservation
PROJECT ORION CUSTODIAN · ORBITAL SANITATION · DEBRIS REMEDIATION · SPACE TRAFFIC CONTROL · SPACE-AS-A-SERVICE	37, 39, 42	NEW — v5.1 reservation
Golden Dawn Trade Dress (navy/gold + buffalo seal)	(trade dress)	Asserted common-law + pending USPTO

SOCOM(rb) is NOT U.S. Special Operations Command. SOCOM(rb) is a private ASG mark denoting Soft-Comms Operational Command (resilience-branch) — the soft-routing / mesh / DNS resilience layer. USPTO filing includes a prominent disambiguation notice. Never merge or conflate the two.

6. Section C — Patents Issued, Pending & Provisional

ASG patent strategy splits into three tiers: (i) issued patents acquired or licensed in; (ii) pending non-provisional applications; (iii) provisional applications establishing priority dates for the Emerging IP portfolios. v5.0 initiates the first wave of provisionals.

Patent / App	Tier	Subject-Matter Summary	Status
ASG-PROV-001	Provisional	SENTINEL-JA dispatch schema — evidence-preserving multi-agency routing	v5.0 — filing window open
ASG-PROV-002	Provisional	CRO Performance Bond & claims-ledger method (non-insurance surety structure)	v5.0 — filing window open
ASG-PROV-003	Provisional	T-104 authorization gate — DFR/UAS ingest governance	v5.0 — filing window open
ASG-PROV-004	Provisional	Concurrent Kit™ — field-ready lawful-peacekeeping responder kit (assembly + process)	v5.0 — filing window open
PROM-PROV-001…015	Provisional (15)	Suppressed Health & Safety Tech recovery / validation / beneficial-use deployment methods (Prometheus Unbound)	v5.0 — filing window open
MIN-PROV-001…024	Provisional (24)	DARPA-derivative beneficial-use repurposing methods — lawful transfer, civilian-oversight, OSCGJ stewardship (Minerva Shield)	v5.0 — filing window open
ATH-PROV-001…012	Provisional (12)	Patent AI pipeline — application-to-issuance orchestration + harm-detection engine + novelty/prior-art graph (Athena)	v5.0 — filing window open
MNE-PROV-001…010	Provisional (10)	Archives search / recovery / lawful-acquisition AI — National Archives, Library of Congress, Smithsonian (Mnemosyne)	v5.0 — filing window open

ARG-PROV-001…022	Provisional (22)	DIANNA distributed intelligence array · LEO satellite constellation · Eye-in-the-Sky ISR governance (Argus Constellation)	v5.0 — filing window open
ORI-PROV-001…018	Provisional (18)	Space Traffic Control · Active Debris Remediation · Orbital Sanitation · Space-as-a-Service gap-closure methods (Orion Custodian)	v5.1 — filing window open

Total provisional wave under v5.1: 4 foundational + 101 Emerging IP = 105 provisional filings targeted for submission within the 12-month priority window. Each provisional locks priority for the subsequent non-provisional. Orion Custodian contributes 18 provisionals covering the first full-stack orbital sanitation / space traffic control / debris remediation patent family.

7. Section D — Trade Secrets & Confidential Know-How

Trade secret subject-matter is governed by the Defend Trade Secrets Act (DTSA, 18 U.S.C. § 1836) and state UTSA analogs. ASG maintains reasonable measures of secrecy including chain-of-custody logs, access control, need-to-know segregation, and written confidentiality obligations.

Category	Subject-Matter	Control Measure
Ops Doctrine — Counsel-Gated	INC-2026-01 Option B playbook; criminal-referral drafts; qui tam relator working files	Attorney work product — counsel-only
Source / Informant Handling	OIIC source register; OLV survivor protection protocols	Eyes-only, compartmented
Financial Forensics	PSL methodology, banking-nexus analytics, USCPB workflow integrations	Eyes-only
AI Model Weights & Prompts	Athena harm-detection model, Mnemosyne retrieval heuristics, DIANNA fusion stacks	Vault storage, hash-committed
Hardware BOMs & Firmware	KoYoTom YAMO variants; Concurrent Kit builds; LEO ground-segment schematics	Supplier NDAs, serialized BOM
Pricing, Bonding & Margin Models	CRO claims-ledger; academy pricing matrix; grant P&L models	Finance lane only
Donor / Funder / Grantee Lists	LES Managing Director (MD) pipeline; Boyd Adams register	Development lane only

Trade secret status is destroyed by public disclosure. Any ASG-issued publication, grant, presentation, or media asset must be scrubbed against the Trade Secret Register before distribution. QA gate: mandatory review by Senior Director (IT & Banking) or Senior Executive Director of Communications before external release.

8. Section E — Emerging IP — Prometheus Unbound (Suppressed Health & Safety Tech Recovery)

Project Prometheus Unbound ($450M) is the ASG lawful-recovery command for confirmed-existing, beneficially-applicable health and safety technologies that have been suppressed, shelved, or rights-locked. IP scope: recovery methods, validation protocols, beneficial-use deployment SOPs, trade-dress, and licensing frameworks.

- 15 provisional patents (PROM-PROV-001…015) — recovery / validation / deployment methods.
- Copyright — Prometheus Lawful Recovery Playbook, Validation Protocol Manual, Deployment SOPs.
- Trademark — PROJECT PROMETHEUS UNBOUND, PROMETHEUS RECOVERY PROTOCOL, BENEFICIAL-USE GATE.
- Trade Secret — shelved-tech source register (counsel-gated), owner-negotiation playbooks.

9. Section F — Emerging IP — Minerva Shield (DARPA Lawful Acquisition)

Project Minerva Shield ($3.25B) is the ASG lawful-acquisition-and-repurposing command for DARPA and related advanced-research programs. The objective is not to extinguish defense research but to re-charter covered programs under civilian oversight, OSCGJ stewardship, and beneficial-use gates — so that dual-use capability serves the living rather than harms them.

- 24 provisional patents (MIN-PROV-001…024) — lawful-transfer methods, oversight gates, repurposing pipelines.
- Copyright — Minerva Lawful Acquisition Charter, Oversight Gate Manual, Beneficial-Use Matrix.
- Trademark — PROJECT MINERVA SHIELD, CIVILIAN OVERSIGHT GATE, BENEFICIAL-USE RE-CHARTER.
- Trade Secret — DARPA program register with beneficial-use classification; lawful-transfer playbooks.

10. Section G — Emerging IP — Athena Patent AI & Harm-Detection Engine

Project Athena Patent AI ($380M) reorganizes the patent lifecycle end-to-end: filing, pending, examination, issuance, and post-grant. Its keystone is a harm-detection engine that screens applications for patterns of intended or foreseeable harm — weaponization against the living, anti-competitive lock-up of essential medicines, extraction schemes targeting consumers — and flags them for human review, conditional grant, or refusal under a lawful, transparent rubric.

- 12 provisional patents (ATH-PROV-001…012) — pipeline orchestration, harm-detection classifier, prior-art graph, anti-evergreening heuristics, inventor-intent modeling.
- Copyright — Athena System Model, Harm-Detection Rubric, Examiner Operating Manual.
- Trademark — PROJECT ATHENA PATENT AI, HARM-DETECTION ENGINE, ETHICAL-GRANT GATE.
- Trade Secret — model weights, training corpus curation, red-team exploit library.

11. Section H — Emerging IP — Mnemosyne Archives AI (National Archives / LoC / Smithsonian)

Project Mnemosyne Archives AI ($195M) builds a lawful search, recovery, and acquisition AI across the National Archives and Records Administration (NARA), the Library of Congress (LoC), and the Smithsonian Institution — surfacing suppressed, mis-catalogued, or access-constrained materials that belong to the American people.

- 10 provisional patents (MNE-PROV-001…010) — cross-institution retrieval, provenance reconciliation, FOIA-aware discovery, lawful-acquisition routing.
- Copyright — Mnemosyne System Model, Provenance Reconciliation Playbook, Lawful-Acquisition Workflow.
- Trademark — PROJECT MNEMOSYNE ARCHIVES AI, PROVENANCE LATTICE, LAWFUL-ACQUISITION GATE.
- Trade Secret — institutional-contact register, catalog-gap atlases, FOIA-appeal playbooks.

12. Section I — Emerging IP — Argus Constellation (DIANNA · LEO · Eye-in-the-Sky)

Project Argus Constellation ($1.9B) unifies three previously-parallel ASG initiatives under a single command: (i) DIANNA — Distributed Intelligence Analytics Neural Network Array, the fusion and analytics brain; (ii) LEO — Low-Earth-Orbit satellite constellation for resilient comms, GNSS-denied PNT, and lawful ISR; (iii) Eye-in-the-Sky — airborne and persistent-stare overwatch programs. All three lanes are re-chartered under civilian oversight, T-104 authorization gates, and OSCGJ stewardship so that overhead capability serves the people rather than surveils them.

- 22 provisional patents (ARG-PROV-001…022) — DIANNA fusion stacks, LEO ground-segment schemas, EiS persistent-stare ethical-use gates, constellation tasking, privacy-preserving ISR methods.
- Copyright — Argus System Model, DIANNA Fusion Playbook, LEO Ground-Segment Manual, EiS Lawful-Overwatch SOP.
- Trademark — PROJECT ARGUS CONSTELLATION, DIANNA, LEO OVERWATCH, EYE-IN-THE-SKY ISR GATE.
- Trade Secret — orbital-mechanics playbooks, tasking heuristics, civil-rights-preserving ISR filters, supplier BOMs.

> Argus Constellation is a unification — the DIANNA analytics lane, the LEO space-segment lane, and the Eye-in-the-Sky airborne lane remain distinct programs inside the constellation. Never merge their command lanes, budget envelopes, or IP sub-registers. Constellation coordination is performed at the SENTINEL-JA tasking layer, not at the program-trust level.

13. Section I-2 — Emerging IP — Orion Custodian (Space Traffic Control · Debris Remediation · Orbital Sanitation)

Project Orion Custodian ($2.4B) is the ASG emerging-space-commerce command for the gap-closure services that the orbital economy requires but cannot today reliably buy: Space Traffic Control (STC), Active Debris Remediation (ADR), Orbital Sanitation (OS), end-of-life satellite disposal, and Space-as-a-Service (SpaaS) delivery frameworks. Orion Custodian is chartered under civilian oversight and OSCGJ stewardship, coordinates with Argus Constellation at the SENTINEL-JA tasking layer, and is explicitly non-weaponized — cleaning the sky before the sky falls on us.

IP scope spans five gap-closure families: (i) non-cooperative rendezvous, capture, and de-orbit methods for inert debris and dead satellites; (ii)

constellation-scale traffic-control algorithms for conjunction avoidance under partial-information conditions; (iii) orbital-sanitation service patterns (deposit-and-retrieve, launch-bonding, end-of-life obligations); (iv) Space-as-a-Service delivery frameworks for payload hosting, data relay, and on-orbit servicing; (v) space situational awareness (SSA) fusion layers that feed Argus DIANNA without merging command lanes.

- 18 provisional patents (ORI-PROV-001…018) — debris-capture end-effectors, tumbling-body rendezvous control, de-orbit propulsion sequences, conjunction-avoidance tasking, orbital traffic arbitration, sanitation service patterns, SpaaS delivery schemas, launch-bonding instruments, end-of-life disposal SOPs, SSA fusion layers.
- Copyright — Orion Custodian System Model, STC Operating Manual, ADR Field Playbook, Orbital Sanitation Service Charter, SpaaS Delivery Framework, Launch-Bonding Prospectus.
- Trademark — PROJECT ORION CUSTODIAN, ORBITAL SANITATION, DEBRIS REMEDIATION, SPACE TRAFFIC CONTROL GATE, SPACE-AS-A-SERVICE, LAUNCH-BONDING, END-OF-LIFE OBLIGATION.
- Trade Secret — capture-device BOMs, thruster-signature libraries, conjunction-tasking heuristics, debris-ownership reconciliation playbooks, launch-bonding underwriting models, supplier NDAs.

Orion Custodian is additive to Argus Constellation — Argus is the overwatch/ISR/PNT lane; Orion is the janitor/traffic-cop/gap-closure lane. Both share SSA data via SENTINEL-JA but keep separate command, budget, and IP registers. Never merge. Orion's revenue model is commercial-services-first (ADR contracts, STC subscriptions, SpaaS fees, launch-bonding premiums) which means it can underwrite lanes that Argus cannot and vice versa.

14. Section J — Licensing Matrix & Royalty Routing

All Tier-1 IP is licensed to Tier-2 lane trusts and third parties by private contract. Royalties return to the Tier-1 Master Holding Trust. The royalty routing schema is:

IP Family	Licensee Lane	Royalty % (net)	Reporting Cadence
PAG / AVR / AMERI / GLOBAL publications	APEA; ASG Buffalo Publishing	12–25%	Quarterly
APEA / ITAGS courses	APEA Operating Trust	15–20%	Quarterly
APC / SOCOM(rb) / APCMD ESU software	APC Trust; SOCOM(rb) Trust; APCMD ESU Trust	10–18%	Quarterly
MEDCOM / AVCOM / NDCC / SENTINEL-JA	Respective lane trusts	10–15%	Quarterly
Prometheus, Minerva, Athena, Mnemosyne, Argus	Respective program trusts	8–15% + success bonuses	Quarterly + milestone
Orion Custodian (STC / ADR / OS / SpaaS)	Orion Custodian Trust	10–18% + launch-bonding premium share	Quarterly + milestone
DV Joint Works (Eric Janik carve-out)	DV Trust (co-owned via registry)	Per executed addendum	Quarterly

15. Section K — Brand & Domain Inventory

Core production domains and brand properties are listed below. Unauthorized impersonation, typo-squatting, and infringing product listings are monitored by the asg-contractor-surveillance weekly scheduled task.

Domain / Property	Role	Owner / Status
asgdirectorate.com	Primary corporate/command site	Principal-owned, live
asg-lawofthe.land	Constitutional doctrine & academy portal	Principal-owned, live
apcpeacekeepingcoms.online	APC communications site	Principal-owned; usurpation under pre-trial litigation posture (former acting PKTF staff)
asgbuffalopublishing.* (target)	Publishing storefront	Reserved, v5.0

athena-patent.ai (target)	Athena platform marketing	Reserved, v5.0
mnemosyne-archives.ai (target)	Mnemosyne platform marketing	Reserved, v5.0
argus-constellation.com (target)	Argus Constellation program site	Reserved, v5.0
orion-custodian.space (target)	Orion Custodian program site (primary)	Reserved, v5.1
orbital-sanitation.com (target)	Orion Custodian services storefront	Reserved, v5.1
launch-bonding.com (target)	Orion Custodian launch-bonding underwriter	Reserved, v5.1

16. Section L — Software, Scripts, Skills & AI Models

21 custom ASG skills are installed in .claude/skills/ and form the production engine. Build scripts (python-docx) and helpers (asg_helpers.py, gen_covers.py, build_*.py) are copyright-protected compilations. AI model weights for Athena, Mnemosyne, DIANNA, Argus, and Orion Custodian (STC conjunction fusion, ADR capture-control, SpaaS orchestration) are vault-stored trade secrets.

17. Section M — Publications & Academy Course Catalog

ASG Buffalo Publishing catalog: 23 PAG volumes, 12 AVR volumes, 12 AMERI volumes, 12 GLOBAL volumes, Cirello Codex V6, Lawful Authority Compendium, The Crossing, E-Library Suite (60 products), AMERI/GLOBAL grant + dossier, AI Tactical Edge, USCPB-KYC response, plus 100+ media production scripts (YouTube, Double Twin, News Desk, Mock Court, HeyGen). APEA/ITAGS catalog: 2,000 courses across 24 schools.

18. Section N — Data Sets, Dashboards & Operational IP

29 interactive HTML dashboards (War Room, Mega Command Center, Monetization V3, APEA/ITAGS 2000-course platform, 6 program portals, 2 websites, 3 e-learning portals, and the new Unified Command Center). All data sets (Evidence Timeline, Congressional Tracker, Contractor Watchboard) and their underlying records are Tier-1 IP.

19. Section O — Bonds, Performance Instruments & CRO Framework

ASG operates a $3.5B CRO Performance Bond framework (claims, not insurance). Bond schedules, claims ledger, and CRO methodology are trade secret. Participation is by private contract; bond instruments do not transfer IP but attest to performance.

20. Section P — Confidentiality, Chain-of-Custody & Access Logs

All counsel-gated material, INC-2026-01 evidence, and source-handling records are logged with chain-of-custody markers and access audit trails. Access is role-gated to the Executive Layer (see user preferences / v1.6 block).

21. Section Q — Removed-for-Cause Register (INC-2026-01)

David Gall and Joey Novak — removed for cause per INC-2026-01. Zero IP claim, zero authority, zero access, zero representation. Never reintroduce in any role. Any asserted claim by removed personnel is void ab initio under this Schedule D.

22. Section R — Recommendations (R-SCHD-01 through R-SCHD-22)

R-SCHD-01 — File the 4 Foundational Provisionals

Submit ASG-PROV-001…004 (SENTINEL-JA, CRO Performance Bond, T-104 gate, Concurrent Kit) within 60 days. Lock priority dates.

R-SCHD-02 — Open Provisional Windows for All 6 Emerging IP Programs

Initiate drafting for PROM (15), MIN (24), ATH (12), MNE (10), ARG (22), ORI (18) — 101 provisionals total — on a 180-day staggered cadence.

R-SCHD-03 — Priority USPTO Trademark Wave

File ASG, GSG, APC, APEA, AIMDI, ASG BUFFALO PUBLISHING, and the 5 new PROJECT marks on the Principal Register within 90 days.

R-SCHD-04 — Golden Dawn Trade Dress Assertion

Publish common-law trade dress notice and file supplementary USPTO application covering navy-gold-buffalo composite.

R-SCHD-05 — SOCOM(rb) Disambiguation Protocol

Include prominent 'Not U.S. SOCOM' disambiguation notice in all filings, products, and marketing using this mark.

R-SCHD-06 — Batch TX Copyright Registration — Tier 1 Works

Register PAG 23 volumes, AVR 12, AMERI 12, GLOBAL 12, Codex V6, Lawful Authority Compendium, E-Library Suite via batch TX filings within 12 months.

R-SCHD-07 — Trade Secret Access Matrix

Publish role-keyed access matrix; enforce need-to-know segregation; audit access logs quarterly.

R-SCHD-08 — DTSA Compliance Audit

Confirm all ASG NDAs carry 18 U.S.C. § 1833(b) whistleblower notice to preserve exemplary-damages eligibility.

R-SCHD-09 — DV Joint Works Registry — Standing Update

Quarterly reconciliation of the DV Joint Works Registry (Eric Janik carve-out) with signed attestations.

R-SCHD-10 — TEAC.pro License Confirmation

Annual confirmation that TEAC.pro license in-flow and derivative works routing remain executed and current.

R-SCHD-11 — Removed-for-Cause Standing Notice

Maintain public-facing standing notice re: Gall and Novak per INC-2026-01 counsel guidance; never dilute, never retract without counsel approval.

R-SCHD-12 — Chain-of-Custody Automation

Deploy automated CoC logging across all counsel-gated repositories; quarterly attestation by Senior Director (IT & Banking).

R-SCHD-13 — Athena Patent AI Pilot Against ASG's Own Filings

Use Athena's harm-detection engine to dogfood against ASG's own provisional drafts — demonstrates the ethical-grant gate is applied evenly.

R-SCHD-14 — Mnemosyne Pilot — NARA Catalog Gap Atlas

Build first catalog-gap atlas for a defined subject-matter (e.g., post-9/11 Ground Zero medical records) as proof-of-concept and public good.

R-SCHD-15 — Argus Constellation Ethics Charter

Publish the civilian-oversight / T-104 charter governing DIANNA, LEO, and EiS tasking before any operational deployment.

R-SCHD-16 — Prometheus Recovery Transparency Ledger

Maintain a public, redacted ledger of technologies under Prometheus recovery with status updates — builds donor and public trust.

R-SCHD-17 — Minerva Beneficial-Use Board

Stand up a mixed civilian/medical/legal board to review every DARPA-derivative beneficial-use re-charter proposal; publish findings.

R-SCHD-18 — Annual Schedule D Rebase (v5.x Cadence)

Schedule D rebase annually in April; patch-forward only; prior versions sealed in _archive_schedule_d/.

R-SCHD-19 — Orion Custodian — Launch-Bonding First Offering

Underwrite the first commercial launch-bonding instrument within 180 days of v5.1 lock. Tie premium to end-of-life disposal obligation; proceeds route to Orion Custodian Trust with Tier-1 royalty share.

R-SCHD-20 — ADR-as-a-Service Go-to-Market

Publish the first Active Debris Remediation service menu and pilot contract template. Target two signed pilots (one commercial, one government/civilian-oversight) within 12 months. Revenue-share routes per Section J.

R-SCHD-21 — Space Traffic Control Regulatory Engagement Gate

Stand up the civilian-oversight charter and T-104-equivalent authorization gate BEFORE any commercial STC feed is contracted. No operational STC service without the charter published; coordination with Argus Constellation at SENTINEL-JA layer only.

R-SCHD-22 — Orbital Sanitation Corps Training Track

Open an APEA/ITAGS course pipeline for Orbital Sanitation crews — ADR operators, STC controllers, SpaaS coordinators. Cross-credit with RSMN K9/equine mobility and Desert Valor maritime/DEEP training where relevant. Credential under ITAGS Maritime & Specialized Operations Institute.

23. Glossary of Abbreviations & Acronyms

Abbreviation	Expansion
ASG	American Services Group — CONAM unified command & conglomerate of UIAs
GSG	Global Services Group — OCONAM international private contracting arm
OSCGJ	Original, Superior, Concurrent, General Jurisdiction
UIA	Unincorporated International Association — private lawful association form
APC	American Peacekeeping Communications — hard assets / dispatch centers
SOCOM(rb)	Soft-Comms Operational Command (resilience-branch) — NOT U.S. SOCOM
APCMD ESU	APC Mobile Dispatch — Emergency Support Unit
APEA	American Peacekeeping Executive Association — academy & credentialing
ITAGS	Institute of Technology & Graduate Studies
AIMDI	ASG International Unified Domain Joint Commission on Multi-Purpose Working Dog & Decoy/Helper Training Standards — Institute of Technology & Graduate Studies
DIANNA	Distributed Intelligence Analytics Neural Network Array

LEO	Low-Earth Orbit (satellite constellation)
EiS	Eye-in-the-Sky (airborne / persistent-stare overwatch)
CRO	Claims-and-Recovery Obligation — ASG performance-bond framework
DTSA	Defend Trade Secrets Act — 18 U.S.C. § 1836
INC-2026-01	Internal incident discipline frame — active, counsel-gated
USCPB	US Capital Private Bank
GFG	Global Family Group / Global Family Treasury
LES	Legal Equal Services — Maryland funder
PAG	Private Attorney Reference — 23-volume doctrinal series
AVR	Anna Von Reitz — 12-volume doctrinal reference series
AMERI	American Integrated Response & Enforcement Series — 12-volume field manual set
GLOBAL	Global Operational Leadership, Oversight, Bonding, Accountability & Logistics — 12-volume international field manual set

24. Authority, Attestation & Autograph

I, Robert 'Bobby' Cirello, Principal Owner of American Services Group and Global Services Group, attest that this ASG Master Schedule D v5.1 is true and correct to the best of my knowledge and that it is hereby entered into the Tier-1 Master Holding Trust record as the authoritative intellectual-property register, superseding v5.0 and v4.2. Patch-forward only. v5.1 adds Project Orion Custodian (Space Traffic Control · Active Debris Remediation · Orbital Sanitation · Space-as-a-Service) as the sixth Emerging IP portfolio.

A1 — Bowman Draft

SLOT A1 · Re: Consolidating Redundant Programs Under APEA/ITAGS + Folding In Your Classes & Colleges

TO: paulrobertbowmanjr@proton.me DATE: 2026-04-21 14:41 UTC ACTION: SEND / EDIT / HOLD

Paul,

Agreed across the board — we're carrying too much redundant academic weight across lanes, and the cleanest fix is to collapse it all into APEA/ITAGS and let that be the single academic home of record. Here's how I want to do it.

1. APEA/ITAGS becomes the unified academic spine.
One academic brand, one catalog, one credentialing pathway. Everything else either licenses in, feeds in, or retires.

- APEA = 7 schools (Constitutional Enforcement, Investigations & Intelligence, Executive Protection, Emergency Services & Tactical Medicine, Field Operations & Dispatch, Leadership & Peacekeeping Ethics, Continuing Education).
- ITAGS = 4 institutes (Advanced Technology & Cyber, Simulation & Applied Research, Maritime & Specialized Operations, PAG Doctrine & Constitutional Studies).
- Current catalog: 2,000 courses across 24 schools/institutes under the APEA/ITAGS umbrella — $186.2M Y5.

2. What gets consolidated (program-by-program fold-in).
Every training-adjacent program in the portfolio gets routed through APEA/ITAGS as its credentialing authority, even if the operator is a different lane:

- RSMN Peacekeeping Academy (380+ hrs) → APEA Constitutional Enforcement school.
- PAG 23-volume doctrine study → ITAGS PAG Doctrine Institute (Level 1–4 cert tracks).
- AVR 12-volume doctrinal series → ITAGS PAG Doctrine Institute (Level 1–4 AVR Academy, 80+ hrs; AVR 60/40 royalty honored).
- AMERI/GLOBAL field manuals (24 volumes) → APEA Field Operations & Dispatch + ITAGS Maritime & Specialized Ops.
- Desert Valor training (three campuses) → APEA Graduate Institute with the DV carve-out preserved for Eric's Joint Works Registry items.
- AIMDI K9/MPWD credentialing → APEA Continuing Education + ITAGS Simulation (welfare commission, decoy school, judge cert all live under APEA now).
- RMC-Rail Academy → APEA Field Ops + ITAGS Maritime.
- PSL Financial Intelligence Academy → APEA Investigations & Intelligence.
- OLV Child Protection Center training → APEA Emergency Services & Tactical Medicine + Investigations.
- MEDCOM (your shop) — see section 3.

Net effect: one catalog, one transcript, one credential — no more duplicated curriculum across operating trusts.

3. Folding in your classes and your colleges.
This is where I want your direct input locked in, not inferred. Your entire portfolio is institutionally core to the Medical Command Division — not a bolt-on.

a. MEDCOM becomes the clinical/medical school inside APEA. Every tactical medicine, emergency medicine, trauma, wilderness medicine, and pre-hospital care course you run flows under APEA Emergency Services & Tactical Medicine, with you as Chief Medical Officer / Senior Medical Director — enterprise-wide, no dilution.

b. Your classes land in the 2,000-course catalog with their own APEA-MED-### numbering. I'll have the catalog opened for you to drop course titles, syllabi, credit hours, and prerequisites directly, and we'll issue clean APEA course codes for each.

c. The colleges you bring in — institutional partners, teaching hospitals, university affiliations, whatever you've been standing up — route through APEA/ITAGS articulation agreements. That way:
  - Your colleges retain their own branding and independence.
  - Students earn APEA credit that transfers both directions.
  - Royalty and fee flow goes through the APEA Operating Trust → Schedule D → Tier-1 Master Holding Trust, with your compensation locked in the MEDCOM contract.

d. TEAC.pro carve-out stays intact. Per Schedule D v6.0, TEAC.pro is NOT assigned to the Master Holding Trust — that's your property, and it remains so. MEDCOM and APEA-MED relationships with TEAC.pro run on private contract, not IP transfer. Nothing in this consolidation changes that.

e. Trustee track. Your 90-day optional trustee window is still open. Say the word when you're ready.

4. What I need from you this week.
- List of your active colleges / teaching affiliations you want folded in (names, contacts, current relationship status).
- List of your current and proposed courses (titles + brief descriptions — we'll build the syllabi).
- Any faculty you want recognized as APEA instructor corps under MEDCOM.
- Your preferred revenue split structure for the courses you bring in — tuition share, royalty on materials, or salary-based under MEDCOM. I'll structure whichever you prefer.

5. Timing.
I want the consolidation package drafted and ready for counsel review within 30 days. Once counsel blesses it, we issue the unified APEA/ITAGS v2.0 catalog, retire the redundant curriculum sitting in other operating trusts, and push the new unified credentialing out to LES, IACP, and the RSMN network.

6. Continuity.
No vacancies. No dilution. No change to trust ownership or Schedule D IP routing. TEAC.pro carve-out preserved. Desert Valor Joint Works carve-out preserved. Your role as Senior Medical Director / CMO of MEDCOM is untouched and gets stronger under this structure, not weaker.

Let me know what's workable and what you want changed. Glad we're on the same page — this is the right move.

A2 — Beard Draft

SLOT A2 · Re: Gall / Contact Attempt to AVR on Patents — Posture & Next Steps

TO: robert@beardconsulting.us DATE: 2026-04-21 14:41 UTC ACTION: SEND / EDIT / HOLD

Robert,

Thanks for flagging this. Noting for the record so we stay clean under INC-2026-01.

1. Status of the party in question.
The individual you referenced was removed for cause per INC-2026-01. He holds no role, no authority, no representation, and no IP claim inside ASG, GSG, or any operating trust. That is permanent and not under review.

2. The approach to Anna on patents.
Any outreach to Anna Von Reitz by a third party purporting to speak to ASG patents, ASG IP, or the AVR publishing relationship is unauthorized and is not sanctioned by the Principal Owner. The IP spine is locked:

- All IP is owned by the ASG Unified Command Master Holding Trust (Tier 1), routed per Schedule D v6.0.
- AVR-derivative works operate under the R-SCHD-16-B 60/40 royalty split (60% Anna Von Reitz / 40% ASG Buffalo Publishing) and are executed through a private contract between ASG Buffalo Publishing and Anna directly — not through any intermediary.
- No outside party has standing to renegotiate, reinterpret, or inquire into those patents, marks, or royalty terms on behalf of ASG. Period.

3. What we do next.
a. Preserve the evidence. Please keep any emails, screenshots, call logs, voicemails, or message threads related to the attempted contact. Chain of custody matters.
b. Do not engage back. No response, no correction, no confrontation from our side. Counsel handles it.
c. I'll route the preservation package through counsel under INC-2026-01 (Option A posture — civil remedies first; Option B stays prepped for counsel only).
d. If Anna receives direct contact on ASG patents or IP, our position to her — which I will communicate through the proper private channel — is simple: any such outreach is unauthorized and she should treat it as noise. The royalty arrangement between Anna and ASG Buffalo Publishing is unchanged.

4. Continuity.
No vacancies created. No dilution of authority. No change to trust ownership or Schedule D IP routing. The Desert Valor Joint Works carve-out with Eric remains untouched. TEAC.pro carve-out honored.

5. Your role.
Appreciate the heads-up — that's exactly the kind of thing the Senior Deputy Executive Director chair exists to catch. Keep eyes on it. If another attempt surfaces, forward it straight to me and I'll push it to counsel.

Standing by.

Bobby

—
INC-2026-01 discipline: internal, factual, evidence-based. Counsel-gated. No public accusations.

B1–B7 — Congressional Follow-Ups (21 days stale)

CONTEXT

All 7 drafts dated 2026-04-02. Current numbers: $97M OLV portfolio · 7 subjects · $12.5–$16.6B FCA exposure · Southwest Key ($1.7B), Endeavors/BCFS ($2.0B incl. $529M sole-source), Providencia ($500M), MVM ($800M) · DOJ 2024 lawsuit referenced · Escobar (2016) implied-false-certification theory, 18,294-word Qui Tam Addendum.

B1 — Comer (House Oversight & Accountability)

Honorable Chairman Comer,

I am writing to follow up on the Operation Lost Voices materials previously submitted to the House Committee on Oversight and Accountability.

As you are aware, this initiative documents systemic failures in the federal Unaccompanied Children program — failures that have exposed an estimated $12.5–16.6 billion in False Claims Act liability across seven subjects, including federal officials and contractors receiving billions in taxpayer funding.

Since our initial submission, the following developments have occurred:

— The DOJ's 2024 lawsuit against Southwest Key Programs confirmed the pattern of sexual abuse and safety violations documented in our referral package.
— Additional HHS-OIG audits have identified unallowable costs and inadequate internal controls at multiple contractor facilities.
— Whistleblower testimony from Tara Lee Rodas (House Judiciary, April 2023) and career HHS employee Deborah White corroborate systematic sponsor vetting failures and retaliatory conduct.

The complete OLV document suite — including the Criminal Referral Package, Qui Tam FCA Addendum (18,294 words documenting per-claim violations), US Marshals Packet, and Comprehensive Grant Proposal — remains available for committee review.

I respectfully request that the Committee consider scheduling a briefing or staff-level meeting to discuss the evidentiary basis for these referrals. The children affected by these failures deserve Congressional attention.

Respectfully,
Robert "Bobby" Cirello

B2 — Jordan (House Judiciary)

Honorable Chairman Jordan,

I am writing to follow up on the Operation Lost Voices referral materials previously submitted to the House Committee on the Judiciary.

This initiative documents systemic failures within the federal Unaccompanied Children program implicating criminal conduct under 18 U.S.C. §242 (deprivation of rights under color of law), §§1512/1513 (witness tampering and retaliation), and RICO enterprise liability — alongside False Claims Act violations totaling an estimated $12.5–16.6 billion.

The seven subjects include three senior federal officials and four contractors holding a combined $5 billion in federal contracts. Key evidence includes:

— Pattern of sexual abuse at contractor facilities (confirmed by DOJ 2024 action against Southwest Key Programs)
— Whistleblower retaliation against career HHS employees who reported safety failures
— Systematic weakening of sponsor vetting protocols despite documented risks to children
— Sole-source emergency contracts totaling $529 million to Endeavors/BCFS

Your Committee's jurisdiction over federal criminal law enforcement and the protection of civil liberties makes it uniquely positioned to act on these findings. The complete document suite — Criminal Referral, Qui Tam Addendum, Research Dossier, and supporting evidence — is available for immediate committee review.

I respectfully request a staff-level briefing at the Committee's earliest convenience.

Respectfully,
Robert "Bobby" Cirello

B3 — Grassley (Senate Judiciary)

Honorable Senator Grassley,

I am writing to follow up on the Operation Lost Voices materials previously submitted to the Senate Committee on the Judiciary.

Your long-standing leadership on whistleblower protections and government accountability makes this referral particularly relevant to your Committee's work. Operation Lost Voices documents systemic failures in the federal Unaccompanied Children program — failures that have resulted in children being released to traffickers, sexual abuse at contractor facilities, and the retaliation against federal employees who attempted to report these conditions.

The False Claims Act exposure across the seven subjects is estimated at $12.5–16.6 billion, with per-claim penalties of $13,508–$27,018 under current schedules. The Qui Tam Addendum (18,294 words) documents the implied false certification theory under Universal Health Services v. Escobar (2016).

Key developments since initial submission include the DOJ's 2024 action against Southwest Key Programs and continued HHS-OIG findings of unallowable costs and inadequate controls.

I respectfully request that your staff review the complete document suite and consider scheduling a briefing. These children — and the whistleblowers who tried to protect them — deserve the Senate's attention.

Respectfully,
Robert "Bobby" Cirello

B4 — Cassidy (HELP Committee)

Honorable Chairman Cassidy,

I am writing to follow up on the Operation Lost Voices materials submitted to the Senate Committee on Health, Education, Labor, and Pensions.

Given the HELP Committee's direct jurisdiction over HHS programs and child welfare policy, the findings in this referral are squarely within your purview. Operation Lost Voices documents how the federal Unaccompanied Children program — administered through HHS/ORR — systematically failed the children it was designed to protect.

The documented failures include weakened sponsor vetting that released children to known traffickers, sexual abuse at contractor facilities receiving billions in federal funding, and retaliation against career HHS employees who reported these conditions.

Four contractors — Southwest Key Programs ($1.7B), Endeavors/BCFS ($2.0B including $529M sole-source), Providencia Group ($500M), and MVM Inc. ($800M) — are documented subjects. The combined False Claims Act exposure is estimated at $12.5–16.6 billion.

Your Committee's oversight of HHS operations and child protection policy makes a staff-level review of these materials critically important. The full document suite is available for immediate delivery.

Respectfully,
Robert "Bobby" Cirello

B5 — Guthrie (Energy & Commerce)

Honorable Chairman Guthrie,

I am writing to follow up on the Operation Lost Voices referral materials previously submitted to the House Committee on Energy and Commerce.

Your Committee's jurisdiction over HHS oversight and public health makes this referral directly relevant. Operation Lost Voices documents systemic failures in the federal Unaccompanied Children program that have resulted in children being released to unsafe sponsors, sexual abuse at federally funded contractor facilities, and the suppression of internal safety reporting.

The seven subjects — including three senior federal officials and four contractors holding a combined $5 billion in contracts — face an estimated $12.5–16.6 billion in False Claims Act liability. Key evidence includes DOJ's 2024 lawsuit against Southwest Key Programs, multiple HHS-OIG audit findings, and corroborating whistleblower testimony.

I respectfully request that the Committee's staff review the complete document suite and consider scheduling a briefing on these findings.

Respectfully,
Robert "Bobby" Cirello

B6 — Paul (HSGAC)

Honorable Senator Paul,

I am writing to follow up on the Operation Lost Voices materials previously submitted to the Senate Committee on Homeland Security and

Governmental Affairs.

Given your Committee's jurisdiction over government operations, federal spending, and DHS oversight, this referral addresses precisely the kind of systemic accountability failures that HSGAC is positioned to investigate.

Operation Lost Voices documents how $5 billion in federal contracts were awarded to entities that systematically failed child protection requirements — while senior federal officials weakened oversight mechanisms and retaliated against employees who reported the failures.

The False Claims Act exposure is estimated at $12.5–16.6 billion. The implied false certification theory under Escobar (2016) is detailed across 18,294 words in the Qui Tam Addendum, with per-claim penalties of $13,508–$27,018.

Your leadership on government accountability and fiscal responsibility makes a staff-level review of these materials particularly impactful. The complete document suite is available for immediate delivery.

Respectfully,
Robert "Bobby" Cirello

B7 — Capito (Senate Appropriations)

Honorable Chairwoman Capito,

I am writing to follow up on the Operation Lost Voices materials previously submitted to the Senate Committee on Appropriations.

Your Committee's authority over federal spending makes this referral critically relevant. Operation Lost Voices documents how $5 billion in federal contracts awarded through the HHS Unaccompanied Children program went to entities that systematically failed their child protection obligations — while continuing to receive and expand funding.

The four contractor subjects include:

— Southwest Key Programs: $1.7B in contracts, facilities cited for sexual abuse (confirmed by DOJ 2024 lawsuit), CEO salary of $3.8M
— Endeavors/BCFS: $2.0B including a $529M sole-source emergency contract
— Providencia Group: $500M with extensive subcontracting at full billing rate
— MVM Inc.: $800M with documented chain-of-custody failures

The combined False Claims Act exposure across all seven subjects is estimated at $12.5–16.6 billion — representing a significant recovery opportunity for the federal treasury.

I respectfully request that your staff review the complete document suite, with particular attention to the contract spending analysis and damages modeling. A staff-level briefing is available at the Committee's convenience.

Respectfully,
Robert "Bobby" Cirello

B8–B9 — Discard Candidates

B8 — "ASG Grant Portfolio — $553.6M War Room & All Deliverable Links"

Subject line only. No body. No recipients. Superseded by current $46.5B+ portfolio numbers anyway.
Proposed action: DISCARD.

B9 — empty self-addressed draft (rgc1205@gmail.com, 2026-03-28)

Empty body. Likely scratch draft. Proposed action: DISCARD.

C — Anna Von Reitz Letter (TO STAGE)

STATUS: NOT YET DRAFTED

No existing Gmail draft for Anna. avannavon@gmail.com confirmed on PKTF thread CC (2026-01-30). On your go, I'll stage a fresh GD-format draft covering: (1) R-SCHD-16-B 60/40 AVR royalty confirmation, (2) Vol 23 Court Restoration Companion status + her doctrinal sourcing, (3) AVR 12-volume Doctrinal Series APEA Academy integration (80+ hrs, Level 1-4), (4) unauthorized-contact notice re: Gall per INC-2026-01 — private channel, counsel-gated, not a public accusation.

RECOMMENDATION BATCH — DECISION MATRIX

A1 Bowman: SEND (content matches MEDCOM consolidation strategy + TEAC.pro carve-out + 90-day trustee window).
A2 Beard: SEND (INC-2026-01 discipline preserved, counsel-gated posture, AVR royalty locked).
B1-B7: REWRITE + SEND (21 days stale — current numbers are $46.5B portfolio, update the $5B contract framing to current OLV $97M + $12.5-16.6B FCA — still accurate but add DOJ 2024 update reference).
B8: DISCARD.
B9: DISCARD.
C Anna: STAGE on Principal approval — avannavon@gmail.com confirmed.

CONTINUITY (LOCKED)

• No vacancies created by removals. • No dilution of authority. • No change to trust ownership or Schedule D IP routing (except Desert Valor Joint Works carve-out with Eric Janik + TEAC.pro carve-out with Paul Bowman). • INC-2026-01 discipline: Gall and Novak removed for cause, permanent. Internal, factual, evidence-based. Counsel-gated. • OSCGJ private UIA / trust framing. No sovereign-citizen language.

Robert G. Cirello

Principal Owner, ASG / GSG

2026-04-23

COUNSEL-GATED / ATTORNEY-CLIENT PRIVILEGED

PRIVILEGED & CONFIDENTIAL — DO NOT DISTRIBUTE

American Services Group (ASG)

Unified Command Incident Pack

INC-2026-01

Counsel Packet

Removal for Cause — David Gall & Joey Novak

Evidence Package for External Counsel Review

Prepared for: External Counsel (engagement pending)

Prepared by: Robert "Bobby" Cirello, Principal Owner

Date of Compilation: 2026-04-23

Jurisdiction: OSCGJ — American Land & Soil

Posture: Option A (Civil Remedies First) — default

Option B: Reserved, counsel-gated only

GD Format — v1.0 | Status: LOCKED — patch-forward only

Table of Contents

Section 1 — Executive Summary & Counsel Instructions

Section 2 — Incident Timeline & Factual Record

Section 3 — Legal Framework & Causes of Action (Counsel Review)

Section 4 — Evidence Schedule & Chain of Custody

Section 5 — Recommended Actions & Counsel Decision Matrix

⚠ COUNSEL-GATED — ATTORNEY-CLIENT PRIVILEGED WORK PRODUCT

This packet is prepared in anticipation of counsel engagement regarding INC-2026-01. It contains factual records, evidence schedules, and proposed legal theories for counsel review only. Do not distribute outside the client–counsel relationship. No public accusations. No criminal assertions.

Default posture: Option A (civil remedies first). Option B (escalated remedies, including criminal referral) is fully drafted and reserved for counsel activation only.

Section 1 — Executive Summary & Counsel Instructions

1.1 Purpose

This Counsel Packet consolidates the factual and documentary record concerning INC-2026-01: the removal for cause of David Gall and Joey Novak from all roles within the American Services Group (ASG) / Global Services Group (GSG) unified command structure, and the related withholding of ASG property (radios and associated equipment) by Gall.

The packet is prepared at the direction of the Principal Owner to support external counsel in evaluating civil remedies (Option A — default) and, if necessary, escalated remedies (Option B — reserved).

All entries are factual, evidence-based, and counsel-gated. No public statements, criminal assertions, or distribution outside the client–counsel relationship are contemplated by this packet.

1.2 Parties & Roles

Role	Party / Description
Client	American Services Group (ASG) — a private Unincorporated International Association (UIA) operating under Original, Superior, Concurrent, General Jurisdiction (OSCGJ) on American land and soil.
Principal Owner	Robert "Bobby" Cirello — Principal Owner of ASG / GSG, settlor of the RCTrust (Tier 0) and the ASG Master Holding Trust (Tier 1).
Removed Parties	David Gall (Subject A) and Joey Novak (Subject B) — removed for cause per INC-2026-01. No authority, no access, no representation, no IP claim.
Property in Dispute	ASG-owned radios (KoYoTom YAMO POC dual-mode handhelds on RealPTT network) and associated equipment retained by Gall following removal.
Retaining Trust	ASG Master Holding Trust holds Schedule D IP; Tier-2 APC operating trust owns the hard-asset comms equipment.

1.3 Counsel Instructions — Posture & Scope

OPTION A — CIVIL REMEDIES FIRST (DEFAULT):

- Demand return of ASG property (radios + equipment) via counsel letter

- Notice of termination of any residual claims, licenses, or access
- Preservation-of-evidence letter to both Subjects
- Civil conversion / replevin / detinue analysis for property
- Quiet-title / declaratory relief for Schedule D IP as needed

OPTION B — ESCALATED REMEDIES (RESERVED — COUNSEL-GATED ONLY):

- Criminal referral for theft / conversion / trade-secret misappropriation
- Injunctive relief against further use of ASG marks or IP
- Tort claims (tortious interference, breach of fiduciary duty, fraud)
- Federal claims if interstate wire / mail / computer misuse present

COUNSEL IS INSTRUCTED: begin with Option A. Escalate to Option B only if (a) demand letters are refused, (b) new evidence of ongoing misuse emerges, or (c) counsel independently concludes civil remedies are inadequate.

1.4 Continuity Statements (Mandatory)

- **No vacancies created by these removals.**
- **No dilution of authority among the remaining executive & command layer.**
- **No change to trust ownership or Schedule D IP routing.**
- **Desert Valor Joint Works carve-out with Eric Janik preserved.**
- **TEAC.pro carve-out (Paul Bowman IP exclusion) preserved.**
- **Lane boundaries unchanged (APC ≠ SOCOMM ≠ APCMD ESU ≠ NDCC/Sentinel).**

↑ Return to Table of Contents

Section 2 — Incident Timeline & Factual Record

2.1 Narrative Chronology

Subjects David Gall and Joey Novak held advisory/consultative positions within ASG/GSG pre-incident. Neither held ownership, trustee authority, or IP assignment rights under Schedule D. Both had conditional access to certain operating documents and ASG-owned communications equipment (KoYoTom YAMO POC handhelds) in connection with scoped deliverables.

Commencing in [DATE — counsel to confirm from Principal's log], the Principal identified conduct by both Subjects that materially breached the good-faith condition of their engagement: unauthorized representations of authority, attempts to influence trust structure outside sanctioned channels, and — in the case of Subject A (Gall) — retention of ASG-owned radios after the engagement was terminated.

INC-2026-01 was formally opened as the internal incident record on [DATE — per incident log]. Both Subjects were notified of removal for cause. Written demands for return of ASG property were issued and documented in the iMessage intake log maintained in 06_INCIDENT_PACK.

As of this compilation, the radios and associated equipment remain in Subject A's possession. No further authority, access, or representation has been extended to either Subject. All references to removal in internal documents use the neutral phrasing "removed for cause per INC-2026-01."

2.2 Timeline Table (Counsel to Verify Dates from Intake Log)

Event	Description
Pre-incident	Subjects held scoped advisory roles. No trustee or IP rights.
Incident opening	INC-2026-01 opened internally following breach of good-faith condition.
Removal notices	Both Subjects notified of removal for cause.
Property demand #1	Written demand for return of ASG radios issued to Subject A (Gall).
Property demand #2	Follow-up demand issued; no return tendered.
iMessage intake	Batches 01–03 logged to 06_INCIDENT_PACK intake log.
Batch 04 authorized	EE-01, EE-02, EE-03 Proton forwards authorized for intake log.
Counsel engagement	[PENDING — counsel to confirm engagement date].

2.3 Factual Findings (Evidence-Based)

F-01: Subjects were advisory only; no ownership, trustee, or IP rights granted.

F-02: Both Subjects had conditional access to ASG documents and equipment.

F-03: Subject A (Gall) retained ASG radios after removal despite written demand.

F-04: Subject B (Novak) exited without physical property but with claimed knowledge.

F-05: No trust instrument, Schedule D entry, or written agreement grants either Subject any continuing authority.

F-06: Continuity statements confirmed post-removal: no vacancy, no dilution, no IP re-routing.

F-07: Schedule D IP assignment unchanged; Master Holding Trust retains full ownership.

F-08: Desert Valor Joint Works (Janik) and TEAC.pro (Bowman) carve-outs remain untouched and verifiable from Schedule D v6.0.

↑ Return to Table of Contents

Section 3 — Legal Framework & Causes of Action (Counsel Review)

NOTE FOR COUNSEL: The causes of action below are presented as candidate theories for counsel's independent legal evaluation. Client makes no legal assertions outside the counsel relationship. Counsel will select, modify, or decline theories based on jurisdiction and fact confirmation.

3.1 Civil Theories — Option A (Default)

CA-01 Conversion

Wrongful exercise of dominion over ASG's tangible personal property (radios) after demand. See Restatement (Second) of Torts § 222A.

CA-02 Replevin / Detinue

Action for return of specific chattels wrongfully withheld. State-specific procedure applies.

CA-03 Breach of Fiduciary Duty

To the extent Subjects owed fiduciary duties arising from their access and role — duty of loyalty and duty of care.

CA-04 Tortious Interference

Interference with ASG business relationships, contracts, or economic advantage, if evidenced.

CA-05 Quiet Title / Declaratory Relief (IP)

Declaration confirming Schedule D IP ownership and absence of any interest by Subjects.

CA-06 Unjust Enrichment

Retention of ASG property or benefit without consideration, equity requires restoration.

CA-07 Constructive Trust / Accounting

Imposition of constructive trust on any ASG-origin value retained by Subjects, with accounting.

CA-08 Injunctive Relief (Civil)

Injunction against continued use of ASG marks, IP, or representations of authority.

3.2 Escalated Theories — Option B (Reserved, Counsel-Gated)

CA-B1 Criminal Referral — Theft / Conversion

State criminal statute for theft of movable property; referral only at counsel direction.

CA-B2 Trade Secret Misappropriation

Defend Trade Secrets Act (18 U.S.C. § 1836) and state equivalents (e.g., UTSA) if misuse evidenced.

CA-B3 Federal Computer Misuse

18 U.S.C. § 1030 (CFAA) for unauthorized access, if evidence of computer-based access post-removal.

CA-B4 Wire / Mail Fraud Theories

18 U.S.C. §§ 1341, 1343 — reserved; only on counsel finding of predicate acts.

CA-B5 RICO (Civil)

18 U.S.C. § 1964 — reserved for a pattern if additional actors or predicates surface.

CA-B6 Preliminary Injunction / TRO

Emergency relief if risk of dissipation of evidence or continuing irreparable harm.

3.3 Authorities (Representative, Non-Exhaustive)

- Restatement (Second) of Torts §§ 222A–242 — Conversion and replevin framework.
- Defend Trade Secrets Act, 18 U.S.C. § 1836 (2016) — private civil action for misappropriation.
- Uniform Trade Secrets Act (state adoption) — parallel state remedies.
- 18 U.S.C. § 1030 (Computer Fraud and Abuse Act) — federal computer-misuse predicate.
- Kewanee Oil Co. v. Bicron Corp., 416 U.S. 470 (1974) — trade secret protection is complementary to patent.
- E.I. duPont deNemours & Co. v. Christopher, 431 F.2d 1012 (5th Cir. 1970) — improper means standard.
- Meinhard v. Salmon, 249 N.Y. 458 (1928) — fiduciary duty of undivided loyalty (Cardozo).
- Lumley v. Gye, 2 El. & Bl. 216 (1853) — foundational tortious interference authority.
- American Land & Soil — OSCGJ jurisdiction framing preserved in all ASG instruments.

↑ Return to Table of Contents

Section 4 — Evidence Schedule & Chain of Custody

4.1 Evidence Schedule — Exhibits

Exhibit	Description	Location
EX-GALL-A	iMessage intake Batch 01 — initial breach indicators	06_INCIDENT_PACK intake log
EX-GALL-B	iMessage intake Batch 02 — property retention exchanges	06_INCIDENT_PACK intake log
EX-GALL-C	iMessage intake Batch 03 — post-demand non-responses	06_INCIDENT_PACK intake log
EX-GALL-D	Written demand letter #1 for radio return	Principal record (to be produced)
EX-GALL-E	Written demand letter #2 for radio return	Principal record (to be produced)
EX-GALL-F	Radio inventory and serial numbers (KoYoTom YAMO POC)	APC asset register (Tier-2 lane)
EE-01	Proton email forward — subject: [counsel to confirm]	Batch 04 authorized — intake log
EE-02	Proton email forward — subject: [counsel to confirm]	Batch 04 authorized — intake log
EE-03	Proton email forward — subject: [counsel to confirm]	Batch 04 authorized — intake log
EX-NOVAK-A	Engagement scope record for Subject B	ASG operations record
EX-NOVAK-B	Exit record for Subject B	ASG operations record
EX-SCHD-D	Schedule D v6.0 IP Registry confirming zero IP rights in either Subject	04_COMBINED_DELIVERABLES/
EX-CONT-1	Continuity statements in executive memos post-removal	Internal command record
EX-CARV-DV	Desert Valor Joint Works carve-out record (Janik)	Schedule D v6.0
EX-CARV-TEAC	TEAC.pro carve-out record (Bowman)	Schedule D v6.0

4.2 Chain-of-Custody Protocol

- All intake-log content is recorded contemporaneously in 06_INCIDENT_PACK.
- Original messages preserved in native form (iMessage / Proton) where available.
- Access limited to Principal, counsel-of-record, and designated ASG records officer.
- No editing of originals; all annotations tracked in separate margin log.
- Chain-of-custody entry required for each handoff (date / custodian / purpose).
- Counsel preservation letter to be issued to both Subjects to prevent spoliation.

4.3 Evidence Preservation Notice

Counsel is requested to issue formal litigation-hold / preservation-of-evidence letters to both Subjects, directing them to preserve all communications, documents, and devices related to their ASG engagement and subsequent conduct. Spoliation exposure should be included as a standard notice element.

↑ Return to Table of Contents

Section 5 — Recommended Actions & Counsel Decision Matrix

5.1 Immediate Actions (Counsel-Executed)

A-01 Issue preservation-of-evidence / litigation-hold letters to both Subjects.

A-02 Issue civil demand letter for return of ASG radios and associated property (Subject A).

A-03 Issue notice of termination of any residual claims, licenses, or access (both Subjects).

A-04 Issue notice confirming Schedule D IP ownership and absence of any Subject interest.

A-05 Confirm statute-of-limitations posture for each contemplated civil theory.

A-06 Confirm venue / jurisdiction analysis (OSCGJ framing preserved; counsel selects forum).

A-07 Open engagement file; commence intake of EX-GALL-A/B/C and EE-01/02/03 for review.

5.2 Decision Matrix — When to Escalate

Trigger	Counsel Action
Demand refused / ignored (≥ 14 days)	Escalate to replevin / conversion complaint (Option A continuation).
Evidence of ongoing use of ASG marks / IP	Escalate to injunction / TRO filing.
Evidence of trade-secret misuse	Escalate to DTSA claim (still Option A civil).
Evidence of computer-based access post-removal	Counsel evaluates CFAA predicate (Option B).
Evidence of predicate federal acts / pattern	Counsel-only evaluation of Option B criminal/RICO.
New Subjects or co-actors identified	Expand scope; re-verify continuity statements.

5.3 Client-Side Actions (Not Counsel-Gated)

- Continue INC-2026-01 intake log updates (Batch 04 EE-01/02/03 authorized).
- Maintain neutral internal phrasing: "removed for cause per INC-2026-01."
- Never reintroduce Subjects in any role; no authority, access, or IP claim.
- Preserve Schedule D v6.0 IP registry; confirm carve-outs (Desert Valor, TEAC.pro) remain intact.
- Coordinate all external communications through counsel post-engagement.

• Hold Option B materials in sealed reserve; counsel-gated release only.

5.4 Sign-Off & Handoff

This Counsel Packet (GD format, v1.0) is transmitted to counsel under attorney-client privilege and work-product protection. Counsel is authorized to act on Option A items upon engagement. Option B items remain client-held and counsel-gated; no Option B action is to be taken absent explicit written instruction from the Principal following counsel consultation.

Jurisdiction: OSCGJ — American land and soil. Private UIA / trust operations. No sovereign-citizen framing. All lawful civil remedies are preserved.

INC-2026-01 Counsel Packet | GD Format v1.0 | Counsel-Gated | LOCKED

AMERICAN SERVICES GROUP (ASG)

INCIDENT REPORT AND ANNEX PACKET

INC-2026-01 - David Gall and Joey Novak

Locked for Filing | Justice Anna Review Copy | Draft Affidavit Included

Control Field	Entry
Prepared For	Justice Anna / Oversight Review
Prepared By	Robert "Bobby" Cirello / P1 Overwatch Actual
Date	April 2026
Classification	Internal - Confidential - Filing Preparation
Document Control	INC-2026-01-AFF-ANNEX-v1.0
Evidentiary Standard	Documented Record / Principal-Observed Fact / Open Item Pending Corroboration

NOTICE: This packet is a factual internal filing draft for governance, oversight, counsel review, and evidence preservation. It is not a public accusation document. Allegations not yet supported by attached source exhibits are marked as Open Item Pending Corroboration. Do not distribute outside approved need-to-know channels.

Table of Contents

Right-click this area in Microsoft Word and choose Update Field to refresh the table of contents.

1. Filing Memorandum

This filing packet packages the ASG INC-2026-01 record into a usable annex and declaration format for Justice Anna, counsel review, and internal oversight. The purpose is to preserve the backstory, document the governance basis for removal for cause, and lock the evidence lanes before memory drift, selective reframing, or file loss enters the room like a raccoon in a tuxedo.

The record should be read as a controlled internal account. It does not need theatrical heat. The facts carry enough weight on their own: trusted access was granted, deliverables were not produced to expectation, command confidence degraded, access and authority were terminated, and the ASG trust and intellectual property structure remains intact.

Primary determination: David Gall and Joey Novak are recorded as removed for cause from all ASG roles, access, authority, and IP claims under INC-2026-01. This packet preserves that determination while identifying what still needs source exhibits before any external or formal legal submission.

2. Mandatory 00_SHIELD_OSCGJ Header

Operating footing: American land and soil under Original Superior Concurrent General Jurisdiction (OSCGJ). All actions are private-contract, partner-safe, and within applicable public law. All operations remain subject to lane boundaries, least-privilege access, bonded risk and claims control, full documentation, and auditability.

Trust and intellectual property routing: RCTrust (Tier 0) to ASG Unified Command Master Holding Trust (Tier 1) to applicable operating trusts. Schedule D of the Master Holding Trust holds ASG intellectual property, trademarks, copyrights, patents, trade secrets, media goodwill, and derivative work product unless expressly carved out by written instrument.

3. Source Basis and Record Posture

The packet uses three evidence categories:

- Documented Record - a document, email, log, signed page, system record, or other artifact exists or is expected to be attached.
- Principal-Observed Fact - direct observation or recollection by the Principal, pending source attachment where available.
- Open Item Pending Corroboration - material requiring metadata, file copy, witness statement, or system export before it can be treated as fixed evidence.

Relevant ASG records already support the controlling framework: ASG operates through a trust architecture where Schedule D is the IP registry; lane boundaries are absolute; and Gall and Novak are already reflected in ASG material as removed from ASG roles, access, authority, and IP claims under INC-2026-01. ASG operations manuals also state that lane boundaries, least-privilege controls, bonded risk management, and unified IP routing are non-negotiable.

4. Chronology - Condensed Filing Version

Phase	Event	Summary	Record Posture
Phase 1	Entry and trusted access	David Gall and Joey Novak were admitted into the ASG working circle during active buildout. They were treated as trusted contributors and exposed to operational, governance, and strategic material.	Principal-Observed Fact / Documented Record Pending
Phase 2	Tasking and expectations	They were expected to support build tasks, maintain confidentiality, follow command direction, and produce useful work product.	Principal-Observed Fact
Phase 3	Performance degradation	Repeated failure to produce requested deliverables, coupled with delay/review loops, created operational friction.	Principal-Observed Fact / Deliverable Annex Pending
Phase 4	Control and boundary concerns	Concerns arose around authority alignment, information control, system access, and possible misunderstanding or overreach regarding ASG work product.	Open Item Pending Corroboration
Phase 5	Escalation	Risk shifted from ordinary performance issue to command-confidence and governance-control issue.	Principal-Observed Fact
Phase 6	Removal for cause	Gall and Novak were removed from all ASG roles, access, authority, and IP claims per	Documented Record

		INC-2026-01.	
Phase 7	Containment	Access review, asset inventory, IP affirmation, and evidence preservation were initiated or directed.	In Progress

5. Findings and Determination

- Gall and Novak were granted trusted contributor access during ASG buildout.
- Their access touched work product and systems that fall under the ASG trust and Schedule D IP control model.
- Non-production and delay patterns created measurable operational drag.
- Control and authority concerns created an elevated governance risk requiring containment.
- Removal for cause was a proportionate internal control action.
- No vacancy, dilution of authority, or IP ownership change resulted from removal.
- The core ASG valuation story and future optionality remain intact because assets, IP, doctrine, and operating lanes route through the trust structure rather than through individual contributors.

6. Annex A - Access Revocation Timeline

Purpose: Establish a clean timeline showing what access existed, when revocation was directed, who executed it, and what evidence proves closure.

ID	Access Lane	Required Detail	Status	Action Required
A-001	Email accounts	List all ASG-related accounts used or accessed by Gall/Novak	Pending	Export admin logs / revoke credentials / preserve screenshots
A-002	Cloud drives	Identify shared folders, permissions, downloads, and external shares	Pending	Export access logs / remove permissions / hash key documents
A-003	Messaging channels	Identify Signal, text, chat, Slack/Discord/other channels if any	Pending	Preserve message exports or screenshots with date stamps
A-004	Radio/dispatch platforms	Identify admin/user accounts, talk groups, dispatch privileges	Pending	Export user list / remove credentials / preserve access snapshot
A-005	GitHub/code repositories	Identify repositories, branches, tokens, issue access, server credentials	Pending	Disable tokens / rotate secrets / save audit log
A-006	Financial/grant workspaces	Identify proposal, budget, and investor packet access	Pending	Lock files / version-control final ownership copy

Timeline Statement for Filing: Access revocation is directed as an immediate containment measure. If any access remains open, it is to be treated as a control deficiency requiring same-day closure and written confirmation.

7. Annex B - System and Server Chain-of-Custody

Purpose: Preserve system integrity and show no uncontrolled copy, server, or repository is being treated as the operational source of truth.

ID	Item	Custody Fields Needed	Status
B-001	Primary ASG working files	Folder path / platform / owner / last modified / current custodian	Open
B-002	Server or VPS environments	Provider / IP or host / admin holders / SSH keys / panels	Open
B-003	Databases and dashboards	Database name / credentials / export date / custodian	Open
B-004	Code archives	Repository name / commit hash / branch / contributor permissions	Open
B-005	AI model prompts/build files	Prompt packs / Claude.md / wrappers / model handoffs	Open
B-006	External drives or local copies	Device owner / serial / file set / custody status	Open

Custody Rule: Every file set must have a named custodian, location, access list, and preservation date. No “everybody has a copy somewhere” nonsense. That is how IP walks out wearing sunglasses.

8. Annex C - Communications Log Extract

Purpose: Build a communication timeline without editorializing. The log should include only date, sender, recipient, medium, short description, and exhibit reference.

ID	Date	From	To	Medium	Description	Exhibit
C-001	Date TBD	Bobby Cirello	David Gall	Text / Email / Call	Tasking or expectation communication	Pending
C-002	Date TBD	Bobby Cirello	Joey Novak	Text / Email / Call	Tasking or expectation communication	Pending
C-003	Date TBD	David Gall / Joey Novak	ASG group or individual	Unknown	Delay, objection, non-production, or control concern	Pending
C-004	April 16, 2026	Coordinator training call / related parties	ASG concern chain	Call/Text follow-up	Patent/IP warning discussion and spouse concern	Pending
C-005	Date TBD	Bobby Cirello	Justice Anna or liaison	Email / Text	Request for oversight awareness	Pending

9. Annex D - Deliverable Gap Analysis

Purpose: Document the difference between what was requested and what was produced. This annex should be boring, numerical, and ruthless. Requested, due, delivered, gap. Done.

ID	Requested Deliverable	Assigned To	Due Date	Delivered	Gap Statement	Exhibit
D-001	ASG operational build support	David Gall	Date TBD	Not verified	Gap pending source exhibit	Pending
D-002	OIIC / investigative support or related work	Joey Novak	Date TBD	Not verified	Gap pending source exhibit	Pending
D-003	Proposal / grant support tasks	Gall/Novak	Date TBD	Not verified	Gap pending source exhibit	Pending
D-004	System or code contribution tasks	Gall/Novak	Date TBD	Not verified	Gap pending source exhibit	Pending

Filing Language: The failure pattern is presently recorded as Principal-Observed Fact. It should be upgraded to Documented Record only after task messages, due dates, drafts, or non-delivery confirmations are attached.

10. Annex E - IP Exposure and Protection Statement

Purpose: Affirm that Gall and Novak did not acquire ownership, license, or survivable control over ASG intellectual property by virtue of contribution, review, access, or participation.

Protection Statement: All ASG intellectual property, doctrine, curricula, standard operating procedures, technical frameworks, prompts, grant models, financial models, dashboards, applications, communication architecture materials, training content, and derivative works remain property of the ASG Unified Command Master Holding Trust via Schedule D unless a written carve-out exists.

Exposure Categories:

- Governance structure, trust architecture, and command operating model.
- Grant proposal drafts, financial models, and budget architecture.
- APC, SOCOM(rb), and APCMD ESU communications structure and lane-boundary doctrine.
- OIIC intelligence and investigation materials.
- APEA course, credentialing, and training architecture.
- Sentinel, National Dispatch and Communications Center, and related governance/data concepts.
- Any software, dashboard, application, prompt, model wrapper, or code derived from ASG concepts.

Reservation of Rights: ASG reserves all rights, remedies, claims, and corrective actions related to unauthorized use, retention, disclosure, reproduction, commercialization, derivative use, misattribution, or attempted registration of ASG intellectual property.

11. Annex F - Asset Inventory: Radios, Equipment, Devices

Purpose: Identify controlled hardware or equipment that must be returned, disabled, wiped, or confirmed never issued.

ID	Asset Type	Make/Model	Serial/ID	Custodian	Required Action	Status
F-001	Radio / PTT Device	Make/model TBD	Serial TBD	Assigned to TBD	Return / disable / confirm	Open
F-002	Laptop / tablet / phone	Make/model TBD	Serial TBD	Assigned to TBD	Return / wipe / confirm	Open
F-003	Access cards / keys	Type TBD	Number TBD	Assigned to TBD	Recover / deactivate	Open

F-004	External drives / USB	Type TBD	Serial TBD	Assigned to TBD	Recover / image / seal	Open
F-005	Printed binders / notes	Title TBD	Copy number TBD	Assigned to TBD	Recover / log / destroy copy if authorized	Open

Hard-Asset Rule: APC hard assets require asset logs, serial registries, configuration baselines, delivery receipts, and maintenance records. Missing or unreturned controlled hardware is a bond/claims and evidence issue, not an “oopsie.”

12. Annex G - April 16 IP / Patent Concern Exhibit

Purpose: Preserve the April 16, 2026 warning context regarding “health and safety” IP, patents, copyrights, state/county recording, dashboards, apps, Sentinel, APC/SOCOM(rb), and related code or platform work.

Summary for Filing: On or around April 16, 2026, a coordinator training call included discussion regarding time-sensitive protection or patenting of “health and safety” related information. Subsequent concerns were raised that the topic may relate to ASG-developed dashboards, Sentinel, apps, APC/SOCOM(rb), and other software or platform work. This annex preserves that concern without asserting final proof of misappropriation until call notes, recordings, text messages, or witness statements are attached.

ID	Fact Field	Current Entry	Status
G-001	Call date and platform	April 16, 2026 / platform TBD	Pending
G-002	Speaker asking patent/IP question	Name TBD	Pending
G-003	Anna response or recommendation	Basic Copyright / record with state/county as described by reporting party	Pending source exhibit
G-004	Immediate concern report	Spouse concern / Kenny reported Kimberly had similar response	Pending witness statement
G-005	ASG IP potentially implicated	Dashboard, Sentinel, apps, APC/SOCOM(rb), code, health/safety systems	Pending review

13. Annex H - Witness Statement Templates

Purpose: Obtain short, factual witness statements without argument, speculation, or storytelling.

H.1 Witness Statement - Robert "Bobby" Cirello

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.2 Witness Statement - Kenny Fisher

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.3 Witness Statement - Kimberly [Last Name TBD]

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.4 Witness Statement - Freeda Oshun / spouse witness if applicable

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

H.5 Witness Statement - Other witness TBD

Witness Name: _____

Role / Relationship to ASG: _____

Date of Statement: _____

Statement:

_____

_____

_____

_____

_____

I affirm that the statement above is true and correct to the best of my personal knowledge and recollection.

Witness Autograph: _____ Date: _____

14. Annex I - Notice of Removal for Cause

Use: Internal notice language. Keep it clean, non-defamatory, and operational. Do not add emotional commentary.

Field	Entry
To	David Gall and Joey Novak
From	American Services Group (ASG) - Principal Oversight

Subject	Notice of Removal for Cause and Termination of Access
Effective Date	[Insert date/time]

Notice Text: Effective immediately, you are removed for cause from all American Services Group roles, contributor status, access, authority, platforms, working groups, systems, files, documents, communications channels, equipment, and any claimed or implied decision-making capacity. This notice includes termination of any apparent access to ASG materials, ASG intellectual property, ASG working files, ASG proposals, ASG dashboards, ASG communications architecture, ASG training content, ASG financial models, and ASG operating trust materials.

You are directed to preserve and return all ASG materials, devices, credentials, drafts, copies, downloads, screenshots, notes, recordings, exports, code, and derivative materials in your possession, custody, or control. You are further directed not to copy, disclose, publish, register, file, commercialize, distribute, or represent ASG intellectual property or work product as your own.

Nothing in this notice waives ASG rights, remedies, claims, or protections. All rights are reserved.

Issued by: _____ Date: _____

15. Annex J - Counsel Brief

Issue Presented: Whether ASG had sufficient internal governance basis to remove David Gall and Joey Novak for cause, terminate access, preserve evidence, and reaffirm trust/IP ownership.

Short Answer: Yes. Based on the current record, ASG has a documented operating model requiring lane boundaries, least-privilege access, bonded risk management, evidence preservation, and Schedule D IP routing. Gall and Novak are reflected in ASG records as removed for cause from all roles, access, authority, and IP claims. The annex pack identifies the remaining factual exhibits required to support any external action or formal claim.

Counsel Review Points:

- Confirm all access termination is complete and documented.
- Review whether any cease-and-desist language should issue after evidence preservation.
- Review whether any returned property demand should be sent separately.
- Review whether state/county copyright recording or supplemental IP notice should be filed.
- Review whether witness declarations should be notarized or kept as unsworn internal statements pending escalation.
- Review whether any third-party platform has ASG code, files, or grant materials uploaded by unauthorized persons.

16. Affidavit / Declaration of Robert “Bobby” Cirello

STATE OF _____

COUNTY OF _____

DECLARATION OF ROBERT “BOBBY” CIRELLO

I, Robert “Bobby” Cirello, being competent to state the matters below and having personal knowledge of the facts stated unless otherwise identified as pending corroboration, declare as follows:

1. I am the Principal Owner and principal oversight authority for American Services Group (ASG).

2. ASG operates through a trust-anchored structure in which intellectual property and derivative work product route to the ASG Unified Command Master Holding Trust Schedule D unless expressly carved out by written instrument.

3. David Gall and Joey Novak were admitted into the ASG working circle and were provided trusted contributor access during the buildout of ASG operational, governance, communications, investigations, training, grant, and related workstreams.

4. Their participation created exposure to ASG work product, internal planning, proposal structure, and operational concepts.

5. During the build process, I observed repeated performance, delivery, delay, and command-confidence concerns involving Gall and Novak.

6. As these concerns continued, the matter shifted from ordinary performance disagreement into a control, access, and governance risk requiring containment.

7. I determined that removal for cause was necessary to protect ASG continuity, intellectual property, operational control, and trust integrity.

8. David Gall and Joey Novak were removed from all ASG roles, access, authority, and IP claims under INC-2026-01.

9. To the best of my knowledge, their removal created no vacancy, no dilution of ASG authority, no transfer of ownership, and no change to ASG trust ownership or Schedule D intellectual property routing.

10. I have directed that access logs, communications, deliverable gaps, assets, system custody, and IP exposure be preserved and annexed to this record.

11. Any statement in this packet marked as Open Item Pending Corroboration is not presented as a final evidentiary conclusion until the relevant exhibit, witness statement, or system record is attached.

12. I reserve all rights and remedies for ASG, the ASG Unified Command Master Holding Trust, and all applicable operating trusts concerning unauthorized access, retention, disclosure, copying, derivative use, filing, commercialization, or misrepresentation of ASG materials.

I declare under penalty of perjury under the applicable rules of the chosen forum, and/or affirm under private contract record, that the foregoing is true and correct to the best of my knowledge, information, and belief.

Executed this ____ day of _____, 2026.

Autograph: _____

Robert “Bobby” Cirello

P1 Overwatch Actual / Principal Owner, American Services Group

NOTARY / WITNESS ACKNOWLEDGMENT

17. Filing Checklist

#	Checklist Item	Status
1	Attach source version of ASG record stating removal for cause under INC-2026-01	Open
2	Attach Schedule D / trust/IP proof or summary certificate	Open
3	Attach system access revocation exports	Open
4	Attach communications screenshots / email exports with metadata	Open
5	Attach asset inventory and return demand if needed	Open
6	Attach April 16 IP/patent concern exhibit and witness statements	Open
7	Counsel review for external notice / cease-and-desist posture	Open
8	Finalize affidavit for autograph/notary/ witness	Open

18. Closing Filing Note

This packet is now structurally ready for filing prep. It is deliberately built with placeholders where exhibits are still needed, because pretending gaps are proof is how people get cute and then get smoked on cross-exam. The next hard move is exhibit attachment: logs, messages, access records, and witness statements. Once those are attached, this becomes a locked record, not a story.

19. Source Notes for Internal Reviewer

- ASG Combined Master Grant materials reflect Schedule D trust ownership, lane boundaries, and the specific removal-for-cause entry for Gall and Novak under INC-2026-01.
- ASG Operations Manual materials establish lane boundaries, least-privilege access, bonded risk controls, unified IP routing, records/evidence requirements, and risk/bond triggers.
- Prior ASG IP Containment Plan notes identified the recommended Version 2 annex build: radio serial/property schedule, server chain-of-custody, access-revocation timeline, April 16 patent-warning exhibit, and source appendix with email metadata.

NC-2026-01 — Evidence Intake Log

David Gall (DJ) iMessage Thread — Screenshot Preservation

File: INC-2026-01_Gall_iMessage_Intake_Log.md **Custodian:** Robert "Bobby" Cirello, Principal Owner ASG / GSG**Intake Officer:** ASG Internal Orchestration (Claude), acting on Principal's direct instruction **Status:** OPEN — intake in progress. User indicated "more to follow." **Posture:** Internal, factual, evidence-based. Counsel-gated. No public accusation. Option A (civil remedies first) primary; Option B fully prepped. **Incident Reference:** INC-2026-01 — Removal for Cause, David Gall & Joey Novak (permanent, per user preferences and prior session memory).

Chain of Custody

Batch	Date Received	# Screenshots	Source	Witness	Hash/Ref
01	2026-04-21	16	Principal's iPhone, iMessage thread "DJ - Deputy Exec Director" (title is historical — Gall removed for cause, no active role)	Principal direct	Pending (see Preservation Actions)
02	2026-04-21	~16	Same thread + Gmail contact-picker captures showing distribution list	Principal direct	Pending (see Preservation Actions)
03	2026-04-21	~16 + 3 context captures	Same thread + APC Unit 1 Zoom invite (APCMDonNevada@proton.me, Jan 3) + Messages contact-picker showing group thread composition + Leadership Roster dashboard screenshot (shows Gall + Novak still listed as "Founding Member" contrary to INC-2026-01 — artifact flagged for correction)	Principal direct	Pending (see Preservation Actions)
04	PENDING	TBD	Same thread	Principal direct	Pending

Batch 01 — Substantive Evidence Threads (Preliminary Index)

The following evidentiary threads are visible across Batch 01. Full verbatim transcription and exhibit numbering will be completed after all batches are received, to avoid mid-intake renumbering.

Thread A — $350B SpaceX/Starlink "Nationalization" Scheme into SOCOMM

- Gall pushed framing of a $350B "nationalization" of SpaceX/Starlink assets routed into SOCOMM lane.
- Principal flagged this as a **legal landmine** and rejected the framing.
- Principal established the corrective language: **provider-agnostic space backhaul** (Starlink, OneWeb, Kuiper, Iridium, etc. as optional carriers, not nationalized assets).
- Relevance: evidence of unilateral scope-creep, mislabeling of SOCOMM lane, and attempted insertion of doctrine that violates lane boundaries (APC ≠ SOCOM(rb) ≠ APCMD ESU ≠ NDCC/Sentinel) and OSCGJ private-contract framing.

Thread B — $800B Grant Framing

- Gall repeatedly framed the program as "the single largest grant request in US history" at $800B.
- Principal did not adopt this framing; current locked portfolio figure is $46.5B+.
- Relevance: evidence of inflation/mischaracterization of program scale contrary to Principal's direction.

Thread C — Dismissive Conduct Toward Executive Layer

- "Porsche vs Pinto" and "F1 vs Tricycles" analogies directed at Andy Siivola (Senior Executive Director) and Robert Beard (Senior Deputy Executive Director).
- "Nothing Burger vs entire Food Chain" remark.
- Relevance: direct evidence of conduct inconsistent with ASG executive-layer respect requirements and part of the factual basis supporting removal for cause.

Thread D — FOSEPS Infrastructure Budget Split Negotiation

- Option A: $150M per unit safe-house hardening each.
- Option B: $300M per unit operational-hub buildout each.
- Principal's recorded preference and decision points captured in the thread.
- Relevance: contemporaneous record of FOSEPS budget architecture decisions — useful for Schedule D and FOSEPS trust documentation.

Thread E — Joey Novak Medical Incident (Jan 3)

- Gall reported Joey Novak experiencing chest pains during a Zoom call on Jan 3.
- Relevance: contemporaneous health/fitness-for-duty record; non-public; handled with discretion per counsel direction.

Thread F — Principal's Personal Distress Context (Jan 6 window)

- Principal's contemporaneous texts regarding marital distress and possible divorce paperwork.
- Relevance: ONLY to establish that Gall and Novak continued to press operational demands on Principal during a documented personal-crisis window — evidence of failure of executive care, not for any substantive use on the merits. Handling: restricted-access, counsel-eyes-only within the incident file.

Thread G — Break-Off Messages

- Principal: "I'm not doing this anymore"
- Principal: "you're about 25 years too late buddy lol"
- Gall continued to push for calls/zooms *after* Principal's break-off.
- Relevance: establishes the termination point of Principal's engagement with Gall and the post-break-off pressure that factored into the formal removal for cause.

Batch 02 — Substantive Evidence Threads (Preliminary Index)

Thread H — FOSEPS Infrastructure Budget Split (Detail Capture)

- Option A ("Email"): $1.05B hardening / $450M build — total $1.5B.
- Option B ("Patch"): $1.2B hardening / $300M build — total $1.5B.
- Principal's recorded preference and decision points captured in the thread.
- Relevance: contemporaneous record of FOSEPS budget architecture at the $1.5B (billion) envelope — **corrects any prior mis-transcription to $1.5M**. Feeds FOSEPS trust operations file and Schedule D v6.0 cross-reference.

Thread I — "Answer 3" Three-Question Audit

- Gall presented a three-question audit to Principal covering: (i) SpaceX/Starlink nationalization framing, (ii) terminology discipline (APC vs SOCOM(rb) vs APCMD ESU vs NDCC/Sentinel), and (iii) FOSEPS Infrastructure Budget split.
- Principal's responses reject the $350B nationalization framing and reaffirm provider-agnostic space backhaul; reaffirm lane boundaries; and record FOSEPS split decision.
- Relevance: captures the moment Principal formally corrected the record on doctrine-level items Gall had drifted on. Direct support for removal-for-cause rationale.

Thread J — Pattern of Pressure / Condescension

- Examples captured: "Check Inbox NOW," "Mr. Sleeps to roll outta the fart sack," Gall's self-scoring of his own work at "98/100."
- Relevance: pattern evidence of executive conduct inconsistent with ASG executive-layer standards. Supplements Thread C (dismissive conduct toward Siivola and Beard).

Thread K — Kimberly Michigan Assembly / ChatGPT 5.2 Directive & Beard Succession Parity

- Formal **72-Hour Cure Lane** directive referenced (Kimberly Michigan Assembly / ChatGPT 5.2 instance).
- Principal establishes **Executive Role Parity + Succession** — Robert Beard designated peer/successor to Gall's former role.
- Relevance: contemporaneous record that (a) the 72-Hour Cure Lane was formally stood up during the incident window, and (b) no vacancy was created by Gall's removal because Beard was already parity/successor-designated.

Thread L — Principal's Good-Faith De-Escalation and Break-Off Trigger

- Multiple de-escalation attempts by Principal documented before the "I'm not doing this anymore" break-off.
- Break-off trigger: Gall's continued pressure after Principal's repeated requests to pause.
- Relevance: establishes good-faith conduct on Principal's side; supports Option A (civil remedies first) posture.

Thread M — Rockie Roper Full Legal Name Capture

- Full name asserted: **"William Rockie Roper© All Rights Reserved Without Prejudice"**.
- Relevance: Schedule D v6.0 signatory/party identification for Rocky Roper (Senior Director, Principal Special Assignment — IT & Banking). Preserves the exact reservation-of-rights formulation as asserted by Mr. Roper.

Thread N — Distribution List Confirmation

- Gmail contact-picker captures confirm the distribution list composition at the time Gall was still within the thread.
- Relevance: counsel-gated routing reference — confirms who was and was not a recipient of the substantive threads. No external distribution from this log.

Batch 03 — Substantive Evidence Threads (Preliminary Index)

Thread O — Joey Novak Radio Activation & Provenance

- APC PKTF KoYoTom YAMO POC dual-mode handheld provisioned to Joey Novak.
- Provenance chain captured: **Andy Siivola sourced**, **Robert Beard programmed (no fee charged)**, **Kenny Fisher shipped**.
- Relevance: establishes the radio was an ASG-provisioned asset under APC lane — not personal property of Novak. Material for return-of-assets demand and asset-tracking under Schedule D v6.0. Confirms Beard's technical contribution was donated to the mission.

Thread P — "Fuck Joe" Break-Off Predicate and Group Accountability

- Principal to the thread: "fuck joe" (break-off predicate directed at Novak's conduct).
- Principal to the thread: **"all four of you fucked up"** — naming the group-level failure.
- Relevance: preserves the exact break-off language; supports removal-for-cause narrative by showing Principal's clear articulation of group-level executive failure before the formal INC-2026-01 action.

Thread Q — Gall's Explicit Lane-Crossing Admission

- Gall, in his own words: **"No more lane crossing - that's my fault cause I didn't say that in the beginning."**
- Relevance: **direct admission against interest** on the lane-boundary violation point (APC ≠ SOCOM(rb) ≠ APCMD ESU ≠ NDCC/Sentinel). Independently corroborates Principal's corrective record in Threads A and I. Highest-value single-line evidence item in Batch 03.

Thread R — Joey "Paperweight" Quote (Fitness-for-Duty)

- Gall, re Novak's comms duty: **"The radio becomes a paperweight."**
- Relevance: contemporaneous acknowledgment that Novak was not discharging comms-duty responsibility on the provisioned APC hardware. Fitness-for-duty evidence; cross-reference with Thread E (Jan 3 chest-pains incident) and Thread O (provisioning chain).

Thread S — Gall Mass-Acquisitions Framing ($1T / Claude / Signal / Proton / Andreessen Horowitz)

- Gall's framing: **$1T gross revenue target**, purported "acquisitions" of **Claude, Signal, Proton**, with **Andreessen Horowitz** advising "Founding Members."
- Principal did not adopt this framing.
- Relevance: parallel to Thread A (SpaceX nationalization) and Thread B ($800B grant framing) — pattern of unilateral scope-inflation and unauthorized representation of ASG's posture toward major third parties. **Option B material** (held for counsel-only review) because it may implicate misrepresentation concerns. No public action. No accusation.

Thread T — Leadership Roster Artifact (Corrective Action Required)

- Screenshot captured of a Leadership Roster dashboard showing **David Gall** and **Joey Novak** still listed in **"Founding Member"** status.
- This artifact is **inconsistent with INC-2026-01 removal for cause** (permanent, per Principal's direction and user preferences v1.6).
- Relevance: evidence that the removal-for-cause has not yet fully propagated through all downstream roster artifacts. **Action item:** correct the Leadership Roster dashboard to remove Gall and Novak from Founding Member status and annotate per INC-2026-01. Preserve the uncorrected screenshot as-found for the evidence file.

Thread U — Principal's Marital / Family Distress Voiced Directly to Gall

- Principal to Gall (verbatim, preserved): **"I'm losing my family over this... I told my wife it was gonna be done weeks ago."**
- Relevance: **restricted-access, counsel-eyes-only**. Establishes that Gall was directly informed of Principal's personal-crisis context and continued to apply operational pressure notwithstanding. Supplements Thread F. Not for substantive use on the merits — factual basis for executive-care failure only.

Thread V — Principal's Good-Faith Redemption Requests for Beard and Siivola

- Principal to Gall: **"I think I asked you to do that like five times already"** (re bringing Beard and Siivola forward appropriately).
- Relevance: documents multiple good-faith, on-the-record requests by Principal to integrate/recognize Beard and Siivola — requests Gall did not execute. Supports both (a) Executive Role Parity + Succession record (Thread K) and (b) the pattern evidence supporting removal for cause.

Thread W — APC PKTF Radio Hardware Custody (Identifier Capture)

- Hardware identifiers captured in the thread: **APC# (unit identifier), IMEI, ICCD**.
- Specific identifier values are preserved in-screenshot and will be transcribed to the hardware-custody manifest at the preservation step — not reproduced here in the narrative index.
- Relevance: **APC trust operations** — supports return-of-assets demand and provides chain-of-custody data for the handhelds originally provisioned to Gall and Novak. Cross-reference Schedule D v6.0 (IP / hard-asset lane routing) and APC operating trust records.

Thread X — Distribution List (Batch 03 — Current Composition)

- Messages contact-picker capture shows the group thread composed of: **Robert Beard**, **Rockie Nevada (William Rockie Roper)**, **Jamie / Chris** (secondary recipients), and the **Gall + Novak** pairing within the historical thread.
- Additional context capture: **APC Unit 1 Zoom invite** from **APCMDonNevada@proton.me** dated **Jan 3**, sent to Gall + Novak — corroborates the operational tempo during the Jan 3 window (cross-reference Thread E, Joey Novak medical incident).
- Relevance: counsel-gated routing reference — confirms the Batch 03 distribution composition and the Jan 3 operational context. No external distribution from this log.

Preservation Actions (to complete after intake closes)

1. Export each iMessage screenshot to PNG at native resolution and file under: `06_INCIDENT_PACK/INC-2026-01/evidence/gall_imessage/batch01/`, `…/batch02/`, `…/batch03/` (and batch04+ as received). Context captures (Zoom invite, contact-picker, Leadership Roster) file under `…/batch03/context/`.

2. Compute SHA-256 hash for each screenshot and context capture; record in a manifest CSV alongside received-timestamp, sender, recipient, screenshot-timestamp-visible.
3. For each Thread (A–X above), assemble a verbatim transcript exhibit (**EX-GALL-A through EX-GALL-X**) with the screenshots cross-referenced by SHA-256 and page number.
4. Hardware-custody manifest (Thread O + Thread W): transcribe APC# / IMEI / ICCD identifiers to a standalone `APC_Hardware_Custody_Manifest.csv` under `06_INCIDENT_PACK/INC-2026-01/evidence/hardware/`. Cross-reference APC operating trust records.
5. Leadership Roster corrective action (Thread T): preserve the uncorrected screenshot as-found in the evidence file; separately open a dashboard-correction work item to remove Gall and Novak from "Founding Member" status across all downstream roster artifacts per INC-2026-01. The correction work is a forward action — **not** a modification of the preserved evidence.
6. Cross-reference each exhibit to:
    - The relevant **Schedule D v6.0** section (for IP, SOCOMM lane items, hardware custody, AVR 60/40 royalty split R-SCHD-16-B, TEAC.pro and Desert Valor carve-outs)
    - The **FOSEPS trust operations file** (for Threads D and H — $1.5B envelope)
    - The **APC operating trust records** (for Threads O, R, W — hardware custody and lane boundary)
    - The **72-Hour Cure Lane directive** record (for Thread K)
    - The **INC-2026-01 master case file narrative**
7. Threads **F** and **U** are filed **counsel-eyes-only** (restricted access within the incident file). Handling: not for substantive use on the merits; factual basis for executive-care failure only.
8. Threads **S** (mass-acquisitions framing) and any derivative items are marked **Option B material** — held for counsel-only review. **Do not act on the substantive allegations from this log alone.**
9. No external distribution. Counsel-gated only. Principal controls routing.

Continuity Statements (Mandatory, per User Preferences v1.6)

- No vacancies created by this intake; Executive & Command Layer remains locked as defined.
- No dilution of authority.
- No change to Schedule D v6.0 IP routing.
- Desert Valor Joint Works carve-out (Eric Janik) preserved.
- TEAC.pro carve-out (Paul Bowman) preserved.
- David Gall and Joey Novak remain **removed for cause per INC-2026-01**. No role. No authority. No access. No representation. No IP claim. Permanent.

Status & Next Action

Batches 01, 02, and 03 received 2026-04-21. Log remains **OPEN** pending any potential Batch 04. Substantive evidence threads now indexed as **A through X** across the three batches. Chain of Custody reflects current state. Context captures (APC Unit 1 Zoom invite, Messages contact-picker, Leadership Roster dashboard) preserved alongside Batch 03 iMessage screenshots.

Posture remains preservation-only. Once intake closes, this log will be finalized, exhibits numbered (EX-GALL-A through EX-GALL-X), SHA-256 hashes computed, the APC hardware-custody manifest populated from Threads O and W, and the package routed to counsel under Option A (civil remedies first) posture. Option B fully prepped and included for counsel-only review (Threads S and any derivative items).

No action is taken on the substantive allegations from this log alone. No external distribution. Counsel-gated only. Principal controls routing.

Forward action items (tracked separately, not incident-file modifications):

- Leadership Roster dashboard correction per Thread T (remove Gall + Novak from "Founding Member" status across all downstream artifacts; annotate per INC-2026-01).
- APC return-of-assets demand preparation per Threads O, R, W (counsel-gated).
- Schedule D v6.0 signatory reference update per Thread M (Rockie Roper full legal name formulation preserved as asserted).

Last updated: 2026-04-21 — Batches 01, 02, 03 fully indexed. Standing by.

Batch 04 — EE-Series Proton Forwards (OPEN · Pending Receipt)

Batch ID: EE-01 / EE-02 / EE-03 **Authorization:** Granted 2026-04-21 per Principal directive · pending physical delivery of the Proton forwards to the Principal's workspace. **Status:** AWAITING RECEIPT. These slots are reserved and will be populated the moment the forwards hit `06_INCIDENT_PACK/inbound/`.

Delivery Instructions (for Principal use):

1. Forward each Proton email (EE-01, EE-02, EE-03) as `.eml` to Cowork upload, OR export as PDF from Proton and upload.
2. Drop into `/sessions/.../uploads/` under filenames matching `INC-2026-01_EE-01.eml` (or `.pdf`).
3. On receipt, this log will be extended with:
    - EE-01 — [sender] → [recipient] · [date/time] · subject: [subject] · SHA-256: [hash] · classification: [Documented Record / Principal-Observed Fact / Open Item Pending Corroboration]
    - EE-02 — [same fields]
    - EE-03 — [same fields]
4. Cross-reference EE-series to existing EX-GALL-A through EX-GALL-X threads per Schedule D v6.0 anchors.

Chain-of-Custody Reservation:

- Custodian: Principal · Location: `06_INCIDENT_PACK/` · Access: Principal + counsel only
- Preservation discipline: no modification of Proton source · export timestamps preserved · SHA-256 hashes computed on receipt

Evidence Category (to be assigned on receipt):

- If EE-01/02/03 content is substantively new: classify as Documented Record.
- If it corroborates existing Principal-Observed Fact: elevate the matching thread from Principal-Observed Fact to Documented Record.
- If it raises new allegations without source attachment: classify as Open Item Pending Corroboration and route to counsel-only review.

Last updated: 2026-04-24 — Batch 04 slot reserved · Posture remains Option A civil remedies first · No external action.

§7 Ethics, Posture, Continuity & Counsel Gating
§8 Next Steps — How To Opt In

§1 Executive Summary

OLV (Operation Lost Voices) and PSL (Project Silent Ledger) are two ASG flagship programs that produce documented harm records — missing persons, exploitation disruption, financial fraud forensics — and, as a secondary revenue lane, pursue FOIA-driven recovery claims against the agencies and entities that stonewalled the underlying cases.

This proposal invites a small group of aligned principals — investigators, paralegal shops, forensic accountants, constitutional counsel, and private trust operators — to participate in the FOIA recovery stream on a contract-first, counsel-gated basis.

Participation is NOT equity in ASG or GSG. Schedule D IP routing does not change. Partner share is paid out of net FOIA recovery, on a claim-by-claim basis, under a signed Joint Cooperation Agreement.

WHAT PARTNERS GET:

- → A named lane of FOIA claims to work (state or federal, by region)
- → Access to OLV/PSL evidence packets + chain-of-custody tooling
- → Co-credit on any published case summaries (per Schedule D)
- → Net-recovery share per tier (see §6) — paid on closed claims only
- → Referral rights into APEA training and APC communications rails

WHAT PARTNERS DO NOT GET:

- ✗ Any ownership, management, or seat on ASG/GSG trust structure
- ✗ Authority to speak for ASG, OLV, or PSL publicly
- ✗ Access to INC-2026-01 privileged materials (counsel-gated)
- ✗ Rights to Schedule D IP (copyrights, trademarks, trade secrets)
- ✗ Referral fees for unclosed or withdrawn claims

§2 Partnership Thesis & Who We Are Inviting

The FOIA recovery lane is a stand-alone, contract-governed sub-stream of OLV and PSL. It exists because the agencies, departments, and vendors that originally failed the victims frequently also failed their FOIA duties. When those failures are documented and adjudicated, statutory fees, costs, and in some cases damages are recoverable.

WHO WE ARE INVITING (six profiles):

Retired / Active Investigators

Former LE or federal investigators comfortable running FOIA, subpoena support, and witness interviews under a signed cooperation agreement.

Paralegal Shops & Legal Operations Firms

Teams that can pull, index, and Bates-stamp productions; file Vaughn-index challenges; and manage administrative appeals end-to-end.

Forensic Accountants & Data Analysts

Professionals with the tooling to trace grant flows, procurement trails, contractor payments, and cross-jurisdictional transfers out of FOIA production sets.

Constitutional / FOIA Counsel

Licensed attorneys (state or federal) or qualified paralegal investigators operating under attorney supervision — Option A civil remedies focused.

Private Trust Operators

Private trust structures that can hold, receive, and disburse partner-share distributions without polluting ASG's Schedule D trust spine.

Journalism / Publishing Allies

Editorial partners who publish documented case summaries on a counsel-cleared basis — with co-credit and Schedule D-compliant licensing.

§3 OLV — Operation Lost Voices

OLV AT A GLANCE

- → Mission: Missing persons, exploitation disruption, family support
- → Budget: $97M (grant-stage) · Revenue lane: FCA + FOIA + licensing
- → Subjects logged to date: 7 · FCA exposure modeled: $12.5B–$16.6B
- → Congressional committees notified: 7
- → Operating trust: OIIC lane (Office of Intelligence & Investigations Command)

FOIA Lane Inside OLV:

Each OLV case file is cross-indexed against agency records that should exist under federal and state public-records statutes. Where productions are refused, delayed, or redacted beyond statutory grounds, OLV opens a FOIA docket. Partner investigators and paralegal shops work the docket under cooperation agreement; counsel gates filing. Recoveries (statutory fees, costs, and — where applicable — damages) flow through the partner-share waterfall in §6.

§4 PSL — Project Silent Ledger

PSL AT A GLANCE

- → Mission: Financial harm documentation, restitution readiness
- → Budget: $151.9M (grant-stage) · Revenue streams: 8
- → Core artifact: The Silent Ledger — harm-by-harm forensic record
- → Operating trust: OIIC lane
- → APEA pipeline: Financial Intelligence Academy (certification track)

FOIA Lane Inside PSL:

PSL's forensic ledgers are built directly on top of FOIA/records productions — procurement files, grant disbursement records, audit trails, contractor payment logs, and interagency MOUs. When agencies withhold, claim exemptions without justification, or fail the segregability duty, PSL opens a FOIA claim. Partner forensic accountants and paralegal shops assemble Vaughn-index challenges; counsel gates litigation posture. Recoveries flow through the partner-share waterfall in §6.

§5 The FOIA Recovery Engine — How We Get Paid

FEE & COST RECOVERY AUTHORITY:

→ Federal FOIA: 5 U.S.C. § 552(a)(4)(E) — attorney fees and costs

→ State analogs (e.g., NV NRS Chapter 239; NY POL §§ 84-90; CA CPRA §§ 7920-7930)

→ "Eligibility" = prevailing party or substantial cause (Buckhannon-adjusted post-OPEN Government Act of 2007)

→ "Entitlement" = four-factor balancing (public benefit, commercial interest, nature of records, reasonableness of agency position)

→ Damages (rare but possible): intentional destruction / spoliation / retaliation statutes

COUNSEL GATE — MANDATORY:

→ All complaints (not requests, not appeals) filed by licensed counsel only

→ No fee-share with non-licensed investigators on the attorney-fee line — recovery is split between "statutory-fee" and "cost/expense" buckets (see §6)

→ Partner work-product is owned by ASG Master Holding Trust unless Schedule D says otherwise

§6 Partnership Tiers, Economics & Payout Flow

Tier	Role	Partner Share (Net Pool)	Exclusivity	Minimum Commitment
Tier 1 — Investigator	Field Investigator / Ex-LE	15% of net pool	Per-case, non-exclusive	2 cases/quarter
Tier 2 — Paralegal Ops	Paralegal Shop / Legal Ops	20% of net pool	Regional exclusive	5 cases/quarter
Tier 3 — Forensic Analyst	Forensic Accountant / Analyst	15% of net pool	Per-case, non-exclusive	1 full ledger / qtr
Tier 4 — Counsel Partner	Retained FOIA Counsel	35% of net pool + statutory fees per 5 U.S.C. 552(a)(4)(E)	Lane exclusive (state)	Lead on 3 dockets/qtr

ASG TRUST SHARE (residual after partner share):

→ Routed to ASG Master Holding Trust (Tier 1) per Schedule D

→ Sub-allocated: OLV operating trust (OIIC) · PSL operating trust (OIIC) · Admin Trust (Tier 3A)

→ AVR-derivative publications produced from FOIA product follow the locked 60/40 split (Anna Von Reitz / ASG Buffalo Publishing)

§7 Ethics, Posture, Continuity & Counsel Gating

CONTINUITY STATEMENTS (LOCKED):

· No vacancies created by partner onboarding

· No dilution of authority (Tier-2 operating trust lanes preserved)

· No change to trust ownership or Schedule D IP routing

· Desert Valor Joint Works carve-out with Eric Janik preserved

· TEAC.pro carve-out with Paul Bowman preserved

· INC-2026-01 posture preserved (David Gall, Joey Novak — removed for cause, permanent)

LANE BOUNDARIES (NEVER MERGE):

APC ≠ SOCOMM ≠ APCMD ESU ≠ NDCC/Sentinel

Partners receive a named lane. Lane skipping or merging triggers cooperation agreement review.

OSCGJ FRAMING (MANDATORY):

→ All ASG operations grounded on American land and soil under Original Superior Concurrent General Jurisdiction (OSCGJ)

→ Partner communications must avoid sovereign-citizen language — lawful, private UIA, trust-anchored only

→ International engagement: through GSG / OCONAM contract lanes only

§8 Next Steps — How To Opt In

Principal Review → **Counsel Intake** → **Cooperation Agreement (CA)** → **Lane Assignment** → **First Dockets Opened**

TO SIGNAL INTEREST:

1. Reply via principal.asg@pm.me referencing "OLV/PSL FOIA Partnership v1.0"
2. Indicate tier of interest (1 through 4) and preferred regional lane
3. Provide: licensing / credentialing, conflict check, prior work sample (redacted OK)
4. Confirm willingness to sign the Cooperation Agreement pre-access
5. Confirm counsel gate acceptance for filing posture (Option A default)

TIMELINE (target):

Week 0 → Interest signal received

Week 1 → Counsel intake + conflict screen

Week 2 → Cooperation Agreement drafted and reviewed

Week 3 → Signed CA + lane assigned

Week 4 → First docket(s) opened under partner's name

This proposal expires 60 days after issue date unless extended in writing by the Principal Owner.

§8 Risks, Mitigations & Counsel Gating
§9 Recommended Path Forward (6 R-FOIA Recs — IMPLEMENTED)
§10 Continuity, INC-2026-01 Compliance, Signature

§1 Problem Statement & Research Question

OLV and PSL document harm at the seam where agency systems failed the living — missing persons cases that went cold, exploitation networks that were never pursued, and financial-fraud trails that never reached restitution. A consistent pattern across both programs: the agencies and contractors that failed the underlying case ALSO failed their FOIA / public-records duties.

Research question: Is there enough recoverable statutory-fee and cost value in the FOIA failure layer to justify opening a dedicated partner-staffed lane, counsel-gated, that runs beside the primary OLV/PSL mission?

FINDING (this dossier):

Yes — with disciplined counsel gating, lane exclusivity, and continuity preservation. Recovery is not the primary mission. It is a subordinate revenue lane that compounds the primary mission by forcing the document production that OLV and PSL need anyway.

§2 FOIA Statutory Landscape (Federal + State)

Federal FOIA Core Numbers

20	9	4
Working days — agency response clock (5 U.S.C. § 552(a)(6)(A))	Exemption categories (b)(1)–(b)(9)	Entitlement factors (public benefit, commercial interest, records, reasonableness)

~$6M	2007	1996
FOIA attorney-fee awards tracked in recent circuit-level decisions (illustrative)	OPEN Government Act — restored catalyst / substantial-cause basis	Electronic FOIA Amendments — e-readable duty expanded

STATE ANALOGS SAMPLED:

- → Nevada: NRS Chapter 239 (Public Books and Records)
- → New York: POL §§ 84-90 (Freedom of Information Law)
- → California: Gov. Code §§ 7920-7930 (California Public Records Act — CPRA)
- → Texas: Gov. Code Ch. 552 (Texas Public Information Act — TPIA)
- → Florida: Chapter 119 F.S. — Sunshine / public records
- → Maryland: MD Code, General Provisions §§ 4-101 to 4-601 (PIA)

§3 OLV — Program Snapshot & Infographic

OLV — By The Numbers

$97M	7	$12.5B–$16.6B
Program budget (grant-stage)	Subjects logged to date	FCA exposure modeled

7	12	OIIC
Congressional committees notified	Documents in OLV packet family	Operating trust lane

§4 PSL — Program Snapshot & Infographic

PSL — By The Numbers

$151.9M	8	4
Program budget (grant-stage)	Revenue streams	Core documents in PSL baseline pack

APEA-PSL	4-Tier	OIIC
Financial Intelligence Academy track	APEA certification pathway	Operating trust lane

§5 The FOIA Claim Lifecycle — Funnel View

Conversion By Stage (illustrative)

STAGE 1 — Requests Filed (100%)

STAGE 2 — Production or Determination (~82%)

STAGE 3 — Appealable Denial / Delay (~38%)

STAGE 4 — Administrative Appeal Filed (~22%)

STAGE 5 — Complaint Filed in District Court (~6%)

STAGE 6 — Fee / Cost / Damage Recovery (~4%)

READING THIS FUNNEL:

→ The value concentrates in the bottom two stages — but only if the upper stages are documented to a litigation standard from Day 1.

→ Partner paralegal shops drive Stages 1–4. Counsel drives Stages 5–6.

→ *Percentages are illustrative, drawn from open public-sector FOIA audit literature; actual yield varies by jurisdiction and agency.*

§6 Recovery Math — Bar Charts

Illustrative Gross Recovery By Claim Type (per docket)

Statutory fees (counsel)		45
Cost reimbursement		20
Investigator/paralegal hours		25
Damages (rare)		10

Partner Net Share (after counsel & costs)

Tier 1 — Investigator		15
Tier 2 — Paralegal Ops		20
Tier 3 — Forensic Analyst		15
Tier 4 — Counsel (lead)		35

§7 Comparable Precedents & Case Citations

The following citations are illustrative of the statutory and judicial frame in which OLV/PSL FOIA work sits. They are NOT legal advice. Any reliance on these citations for litigation posture routes through retained counsel.

Buckhannon Bd. & Care Home, Inc. v. W. Va. Dep't of Health & Human Res., 532 U.S. 598 (2001)

Pre-OPEN Government Act baseline on prevailing-party fee-shift doctrine.

OPEN Government Act of 2007, Pub. L. 110-175

Restored substantial-cause / catalyst basis for FOIA fee eligibility.

Davy v. CIA, 550 F.3d 1155 (D.C. Cir. 2008)

Post-OPEN Government Act analysis of the four entitlement factors.

Judicial Watch, Inc. v. U.S. Dep't of Commerce, 470 F.3d 363 (D.C. Cir. 2006)

Improper withholding and segregability duty.

U.S. Dep't of Justice v. Reporters Committee for Freedom of the Press, 489 U.S. 749 (1989)

Core privacy-exemption analysis; public-interest balancing.

Vaughn v. Rosen, 484 F.2d 820 (D.C. Cir. 1973)

Origin of the "Vaughn index" — itemized justification for withholdings.

NLRB v. Robbins Tire & Rubber Co., 437 U.S. 214 (1978)

Interference-with-enforcement exemption (b)(7)(A) scope.

Milner v. Department of the Navy, 562 U.S. 562 (2011)

Narrowed the (b)(2) exemption — important for internal practice / guidance requests.

§8 Risks, Mitigations & Counsel Gating

R1 — Unauthorized practice of law

Risk: Non-attorney partners drafting complaints or appearing before a court.

Mitigation: Counsel gates every filing. Partners perform records, indexing, and investigator work only.

R2 — Conflict of interest

Risk: Partner has prior relationship with target agency or adverse party.

Mitigation: Mandatory conflict screen during intake; partner reassigned or rejected before CA signature.

R3 — Privilege spillage

Risk: INC-2026-01 privileged material seeping into FOIA work product.

Mitigation: INC materials are sidecar-isolated and counsel-gated; FOIA lanes receive only non-privileged intake.

R4 — Fee-share ethics

Risk: Splitting statutory attorney fees with non-attorneys.

Mitigation: Recovery waterfall splits statutory-fee bucket to counsel only; partners paid from net cost/expense pool + program share.

R5 — Public-figure friction

Risk: Targets allege defamation or retaliatory weaponization of FOIA.

Mitigation: All published summaries counsel-cleared; Option A civil remedies posture default; no public accusations.

R6 — Continuity / lane drift

Risk: Partner volume drifts into APC / SOCOMM / Sentinel lanes.

Mitigation: Lane boundaries hard-coded into every Cooperation Agreement; breach = automatic CA review.

§9 Recommended Path Forward — R-FOIA Recs (IMPLEMENTED in this proposal)

Per ASG implement-don't-describe doctrine, each recommendation below is paired with the concrete deliverable in THIS proposal package that fulfills it. No open recommendations remain at close of this dossier.

R-FOIA-01 — IMPLEMENTED

Stand up a counsel-gated FOIA partnership lane inside OLV and PSL, tiered by role and fee eligibility.

Implemented: see Proposal §6 — four-tier partnership matrix.

R-FOIA-02 — IMPLEMENTED

Publish a statutory-authority reference so partners know the fee/cost frame before signature.

Implemented: see Dossier §2 and §7 (federal + state statutes + citations).

R-FOIA-03 — IMPLEMENTED

Bind all partner work under a Cooperation Agreement that preserves Schedule D IP routing and lane boundaries.

Implemented: see Proposal §7 — continuity + lane boundary lock.

R-FOIA-04 — IMPLEMENTED

Route all complaint-stage filings through retained counsel; statutory-fee recovery split accordingly.

Implemented: see Proposal §6 and Dossier §8 R4 mitigation.

R-FOIA-05 — IMPLEMENTED

Preserve INC-2026-01 sidecar isolation — FOIA work product must not touch INC privileged material.

Implemented: see Dossier §8 R3 mitigation and INC-2026-01 Counsel Packet posture.

R-FOIA-06 — IMPLEMENTED

Publish a 5-week intake and activation timeline so principals can model the onboarding curve.

Implemented: see Proposal §8 — Week 0 through Week 4 timeline.

OPEN RECOMMENDATIONS REMAINING: 0

All 6 R-FOIA recs are implemented inside this proposal package (Proposal + Dossier).

§10 Continuity, INC-2026-01 Compliance, Signature

CONTINUITY STATEMENTS (LOCKED):

· No vacancies created by partner onboarding

· No dilution of authority — Tier-2 operating trust lanes preserved

· No change to Schedule D IP routing

· Desert Valor Joint Works carve-out (Eric Janik) preserved

· TEAC.pro carve-out (Paul Bowman) preserved

INC-2026-01 COMPLIANCE:

· David Gall and Joey Novak — removed for cause, permanent. Never reintroduce.

· Privileged INC materials remain counsel-gated and sidecar-isolated from partner work product.

· Language: internal, factual, evidence-based. No public accusations. No criminal assertions without counsel gate.

Robert "Bobby" Cirello

Principal Owner · American Services Group (ASG) CONAM · Global Services Group (GSG) OCONAM

INC-2026-01 Compliant · Counsel-Bound · OSCGJ · Private UIA / Trust Instrument

principal.asg@pm.me · www.asgdirectorate.com

INC-2026-01 · ADDENDUM A

Dates, Positions, and Record Corrections

Attached to: ASG_INC_2026_01_Annex_Pack_Affidavit_Locked_for_Filing

Date: 2026-04-23

Robert "Bobby" Cirello, Principal Owner

American Services Group (ASG) / Global Services Group (GSG)

principal.asg@pm.me · www.asgdirectorate.com

INTERNAL · COUNSEL-GATED · OSCGJ · OPTION A POSTURE

1. Purpose

This Addendum corrects and extends the INC-2026-01 Annex Pack with the precise date anchors, prior-position corrections, and the recommended additional annex structure identified during counsel-review preparation. Nothing here expands the substantive allegations; it tightens the record so the filing packet has the evidentiary armor plate required for any external counsel review, Option-A civil filing, or counsel-gated escalation to Option B.

2. Corrected Position / Status Table

The following table anchors prior-position and current-status for the two individuals referenced in INC-2026-01:

Name	Prior / Recorded Position	Correct Current Status	Date Anchor
David William Gall	Previously listed as Trustee – American Services Group (ASG) in the December 8, 2025 proposal signature block. Also treated internally as assistant executive / Office of Intelligence & Investigations Command (OIIC) support lane.	Removed for cause from all ASG roles, access, authority, and intellectual property claims under INC-2026-01.	Proposal signature block: December 8, 2025. Removal status appears in later ASG materials: April 2026.
Joseph William Novak	Previously listed as Trustee – American Services Group (ASG) in the December 8, 2025 proposal signature block. Internally treated as Office of Intelligence & Investigations Command (OIIC) Director / investigations lane participant.	Removed for cause from all ASG roles, access, authority, and intellectual property claims under INC-2026-01.	Proposal signature block: December 8, 2025. Removal status appears in later ASG materials: April 2026.

Supporting ASG records show the trust / IP spine routes intellectual property through the ASG Unified Command Master Holding Trust Schedule D. Later ASG materials (April 2026) state Gall and Novak were removed from all ASG roles, access, authority, and intellectual property claims under INC-2026-01.

3. Dates to Add to the Chronology

The following date anchors are added to the chronology that appears in the Annex Pack:

Date	Event
November 1, 2025	Strategic acquisition addendum reflected earlier leadership / C-suite structuring and shows the organization was still actively refining senior-role architecture.
December 8, 2025	ASG Unified Grant Proposal letter listed Robert Cirello, Andrew Siivola, David Gall, Joseph Novak, Robert Beard, Rockie Roper, and Kenneth Fisher as trustees / signatories.
December 15–16, 2025	MEDCOM and UNSPMI V7 operations manuals documented the broader ASG lane-boundary, trust / IP, bonding, claims, and command-control architecture.
April 16, 2026	Coordinator training call where patent / copyright urgency around “health and safety” information was raised. This belongs in the IP-risk timeline as principal-reported / pending corroboration.
April 21, 2026	Preliminary Gall / Novak oversight dossier was created for review and further annex development.
April 23, 2026	Addendum update: corrected positions, date anchors, and recommended annex pack for filing.

4. Additional Annexes to Attach to the Packet

These annexes convert the INC-2026-01 record from a narrative story into a filing-ready packet. Each is counsel-gated and should be compiled in the order below before any external submission.

Annex A — Access Authority Matrix

Who had access to what: Google Drive, servers, email, radios, proposal files, dashboards, app code, trademarks, copyrights, patent-related material. Columns: User · Resource · Access Level · Granted Date · Revoked Date · Evidence Reference.

Annex B — Access Revocation Timeline

Date / time access was suspended, passwords changed, devices recovered or still outstanding, admin rights removed, shared-folder permissions locked. One row per revocation event with time-stamp precision.

Annex C — Property / Radio / Equipment Schedule

Serial numbers, assigned user, date issued, return demand (issued / outstanding / returned), current status. KoYoTom YAMO POC handhelds on RealPTT network are the primary controlled-hardware category per APC foundation spec. Every serial accounted for.

Annex D — IP Chain-of-Title Statement

Plain-language chain-of-title: all ASG doctrine, apps, dashboards, proposals, systems, courseware, software concepts, and derivatives route to Schedule D of the ASG Unified Command Master Holding Trust, unless expressly carved out. Carve-outs preserved: Desert Valor Joint Works (Eric Janik) · TEAC.pro (Paul Bowman) · AVR 60/40 royalty split (R-SCHD-16-B).

Annex E — April 16 IP Warning Exhibit

Summary of the April 16, 2026 coordinator training-call statement regarding patent / copyright urgency around “health and safety” information. Who heard it, why it triggered concern (dashboards, Sentinel, apps, APC / SOCOMM, code / platform work), and what ASG did afterward to protect records. Classified as principal-reported / pending corroboration.

Annex F — Evidence Register

Emails, texts, screenshots, meeting notes, server logs, file-history exports, witness statements. Each row: exhibit ID (EX-GALL-A through EX-GALL-X, EX-NOV-A through EX-NOV-F), custodian, SHA-256 hash, collection date, reference location.

Annex G — Non-Defamatory Findings Statement

Clean language: “removed for cause based on governance, access, continuity, and IP-risk concerns,” not personal attacks. Boring, factual, and hard to twist. This is the public-facing synopsis when / if counsel clears any external statement.

Annex H — Corrected Leadership Baseline

Confirm no vacancies, no dilution of authority, no change to trust ownership, no change to Schedule D routing. Name current Executive & Command Layer: Andy Siivola (Senior Executive Director), Robert Beard (Senior Deputy Executive Director), Kenny Fisher (Senior Executive Director of Communications), Rocky Roper (Senior Director, Principal Special Assignment — IT / Banking), Paul Bowman (Senior Medical Director / CMO, MEDCOM), Vinnie Mastropieri (Senior Director, AVCOM). Name new intake: Lisa Torres (Director of Health, Medical, Education, and Research — DHMER track to Executive Medical Director).

5. Continuity Statements (Locked — Non-Negotiable)

LOCKED

No vacancies created by removals. Removals are permanent — David Gall and Joseph Novak are not reintroduced in any role.

No dilution of authority across the active Executive & Command Layer.

No change to trust ownership or Schedule D v6.0 IP routing.

3 Support Rails continue uninterrupted: ASG Operations Trust · ASG Admin Trust · ASG Shared Services Trust.

Desert Valor Joint Works carve-out (Eric Janik) preserved.

TEAC.pro carve-out (Paul Bowman) preserved.

AVR 60/40 royalty (R-SCHD-16-B) preserved.

Lane boundaries hard: APC ≠ SOCOMM ≠ APCMD ESU ≠ NDCC/Sentinel.

Option A (civil remedies first) posture remains default. Option B reserved for counsel-only.

OSCGJ private UIA / trust framing throughout. Never sovereign-citizen.

Neighboring high-net-worth principals never named in written documents. Cross-property liaison runs counsel-gated.

6. Attachment to Filing Packet

This Addendum A attaches to the principal filing instrument: ASG_INC_2026_01_Annex_Pack_Affidavit_Locked_for_Filing.docx. It is read in conjunction with the Counsel Packet and the Status Matrix. The three documents together form the counsel-gated INC-2026-01 review package for Justice Anna Von Reitz and external counsel.

Robert G. Cirello

Principal Owner, ASG / GSG · P1 Overwatch Actual

2026-04-23

JUSTICE ANNA VON REITZ — REVIEW DASHBOARD

INC-2026-01 Counsel-Gated Review · Private · For Your Eyes Only · 2026-04-23

POSTURE: Internal filing-preparation material. NOT a public accusation. NOT a pleading. NOT a request for action. Option A (civil remedies first) default. Option B reserved for counsel-only. No distribution beyond your eyes absent Principal's express authorization.

1. Primary Package — 3 Counsel-Gated Documents + Transmittal

The 4 files below are the core review package. Read in order 0 → 1 → 2 → 3.

0 · Transmittal Letter (start here)

Formal cover: scope, purpose, what is and isn't being asked of you. Signed by Principal.

Open

1 · Counsel Packet — 5 sections

Scope & parties · factual chronology · legal framework & theories · evidence schedule + chain of custody · recommended actions + decision matrix. 45,647 bytes.

Open

2 · Annex Pack + Affidavit (locked for filing)

19 sections · 10 annexes A–J · 12-paragraph declaration · 5 witness statement templates · 8-item filing checklist · posture block. 47,306 bytes.

Open

3 · Status Matrix

Annex status · 8-item filing checklist closeout · 6 counsel review points · IP exposure → Schedule D v6.0 anchor map · chronology → affidavit cross-reference. 43,657 bytes.

Open

4 · Addendum A — Dates, Positions, and Record Corrections (NEW)

Corrected position/status table for Gall & Novak · 6 date-anchor additions to chronology · 8 additional annex specs (Access Authority Matrix · Revocation Timeline · Property Schedule · IP Chain-of-Title · April 16 Warning Exhibit · Evidence Register · Non-Defamatory Findings · Corrected Leadership Baseline). Locks filing-ready armor-plate.

Open

2. Supporting Material — Doctrinal + Trust + Custody Anchors

Context documents so the primary package reads in its full frame. All counsel-gated.

Schedule D v6.0 — IP Registry (docx)

The Tier-1 IP spine. Every ASG asset routes through this. AVR 60/40 royalty split is R-SCHD-16-B. Desert Valor + TEAC.pro carve-outs preserved.

Open

Schedule D v6.0 Standalone Dashboard (html)

Interactive IP registry. Now carries the crimson INC-2026-01 sidebar with 3-button stack (Counsel Packet · Annex Pack · Status Matrix).

Open

Gall iMessage Intake Log

Chain-of-custody log. Batches 01–03 fully indexed (Threads A–X). Batch 04 (EE-01/02/03 Proton forwards) slot reserved, pending receipt.

Open

PHL250 AVR-Sourced Research Dossier — Court Restoration, the Resurgence & the Return to De Jure Governance

Companion volume integrating AVR framework. 25 chapters, 16,308 words, AVR constitutional doctrine throughout.

Open

PAG Doctrine Authoring Engine — Research Dossier — Full Color

10-chapter dossier covering constitutional education crisis, LE doctrine failure, doctrine solution. AVR-adjacent framing.

Open

ASG ERU / AERS / NRF Doctrinal Reference — Ultimate

21-section treatise on AVR framework · property · contract · trust · UTC · bond · UCC · constitutional protections · digital assets. 25,200 words.

Open

Schedule D Consolidated — AVR Royalty Anchor (R-SCHD-16-B) — 12 Volume Collection

AVR_Vol1 through AVR_Vol12 — published under ASG Buffalo Publishing on the 60/40 royalty split. Bibliography honors annavonreitz.com source.

Open Vol 12 Reference

3. What the Principal Is Asking You To Do

Read at your pace. This is a review copy, not a call to action. No deadline. No pressure.

Flag anything that misses the mark on doctrine, law-of-the-land framing, or AVR-sourced constitutional principles.

Tell the Principal if language needs sharpening before counsel handoff — and he revises.

Honor the counsel-gated posture — nothing leaves your hands absent his express authorization.

4. What the Principal Is NOT Asking You To Do

Act on the substantive allegations. Factual threads are still being corroborated (Batch 04 Proton forwards still inbound).

Communicate with David Gall or Joey Novak. Both are removed for cause, permanent, no reintroduction.

Discuss with any third party. If contacted about ASG IP or patents by anyone purporting to represent ASG, the answer is: unauthorized, treat as noise. (Same posture as the Beard memo.)

5. AVR Royalty Reminder — R-SCHD-16-B Locked

All AVR-derivative works authored by ASG Buffalo Publishing remain on the **60 / 40 royalty split:**

60% to Anna Von Reitz · 40% to ASG Buffalo Publishing

Executed by private contract between ASG Buffalo Publishing and you directly. No intermediary. No third-party standing. Nothing in the INC-2026-01 posture touches this arrangement.

6. Gmail Draft Reference

A formal email to `avannavon@gmail.com` has been staged in the Principal's Gmail Drafts folder. It awaits Principal green-light before sending.

Gmail Draft ID: r-8521720522464255811

Subject: "INC-2026-01 · Counsel-Gated Review Copy · Private · For Your Eyes Only." Body mirrors Sections 1–5 of this dashboard. NOT sent.

7. Delivery Method — Your Preference

Principal is waiting on your preferred delivery method. Because posture is counsel-gated, the Principal offers three secure options. Reply via Gmail or through your established private channel with your pick:

Secure upload link (Proton Drive, Cryptpad, or equivalent) — Principal sends a one-time link; files available 72 hours.

Encrypted email attachment (all 4 docx + PAG/AVR supporting as .zip, PGP-encrypted) — requires public key exchange first.

In-person copy — USB delivery at a mutually-agreed location.

If none of the above work, name your method. The Principal will match it.

8. Continuity (Locked — non-negotiable)

- **No vacancies** created by removals.
- **No dilution** of authority.
- **No change** to trust ownership or Schedule D v6.0 IP routing.
- **Desert Valor Joint Works carve-out** (Eric Janik) preserved.
- **TEAC.pro carve-out** (Paul Bowman) preserved.
- **Lane boundaries hard:** APC ≠ SOCOMM ≠ APCMD ESU ≠ NDCC/Sentinel.
- **Gall and Novak removed for cause per INC-2026-01.** Permanent. No reintroduction.

> I trust the email finds you well, after discussions regarding the ASG Training Asset, there seems to be a tremendous amount of redundancy between, APEA, TEAC, AITAGS, ANTAS, APSTC. After much discussion, it seems it would be better served that APEA is the “national” credentialing and accrediting authority. TEAC would facilitate the actual classroom and hands on training. Do we need to keep ANTAS and APSTC or roll those into TEAC? Also, would it be better served to incorporate AITAGS into APEA as the total credentialing authority while TEAC would be the inaugural accredited campus for all Credentialing related to the Certified personnel. We wanted to get your thoughts and feedback on this.
>
> Second topic we need to bring to your attention is the fact of the message I forwarded via text the other day regarding the coordinator training call on April 16, 2026 where a former involved individual asked Anna regarding the US Patent Office and how they should handle protecting or patenting “health and safety” related information before someone else does as time is of the essence. I’m not certain if any of the Apps, Dashboards, software, etc. that any of us have working on could be wrapped up in those comments. The only reason I’m bringing this forward is my wife immediately called me about it as she felt that is had to do with some of the things we’ve been working one whether it’s the Dashboard, Sentinel, or any of the Apps I’ve previously coded for APC/SOCOMM. After the meeting, Kenny said that Kimberly has a similar response to this as my wife. With this said, what IP do we need do what Anna recommended, which is file a Basic Copyright and record it with the state/ county recorder (privately) that claims the patent interest under a sovereign letters patent.
