Per Andy's request during tonight's call, find an editable overarching, simple (AI-assisted) SOP link here:

https://drive.proton.me/urls/PEQS73H518#T7yePbRCAOFV

The thinking is that this may serve as a starting point for the generation of a high-level template suitable for ASG purposes, which may be distributed and edited by designated others for Asset- and DBA-specific units while meeting ASG-approved format and content requirements.

Those with the link may edit. Versions on are not recorded on the Proton Drive; it is presently on. Various versions require various documents. Those would likely need to be housed in the Command Center, somewhere, for example, under the developing sections for each Asset and underling DBA/trade lines/programs (TBD) foundational governance documentation folders.
